## ANNUAL INVESTMENT OPTION COSTS

\$ 60,345

**TOTAL INVESTMENT  
OPTION COSTS**

0.64 %

**WEIGHTED AVG NET  
EXP RATIO**

\$ 173

**TOTAL REVENUE  
SHARING**

\$ 60,172

**TOTAL EFFECTIVE  
MGMT FEE**

Each investment option is listed below. In many cases, especially in 401k plans, part of the expense ratio may be directed via 'revenue sharing' to other service providers such the advisor, recordkeeper or custodian. 12B-1 fees are commonly sent to the advisor while Sub-TA and Shareholder Service (SHR SVC) fees are commonly sent to the recordkeeper and/or custodian. Revenue sharing can be offset against other costs charged by a provider or additive to other costs they charge (see the Annual Cost Breakdown section for additional information). Fi360 calculates the MGMT FEE by subtracting any of these revenue sharing elements from the net expense ratio.

**NET EXP RATIO × \$ ASSETS = \$ COSTS**

## FEE WAIVERS

**BlackRock Advantage Small Cap Core Instl** BlackRock has contractually agreed to waive the management fee with respect to any portion of the Fund's assets estimated to be attributable to investments in other equity and fixed-income mutual funds and exchange-traded funds managed by BlackRock or its affiliates that have a contractual management fee, through June 30, 2023. In addition, BlackRock has contractually agreed to waive its management fees by the amount of investment advisory fees the Fund pays to BlackRock indirectly through its investment in money market funds managed by BlackRock or its affiliates, through June 30, 2023. BlackRock has contractually agreed to waive and/or reimburse fees or expenses in order to limit Total Annual Fund Operating Expenses After Fee Waivers and/or Expense Reimbursements to 0.75% (for Investor A Shares), 1.50% (for Investor C Shares) and 0.50% (for Institutional Shares) of average daily net assets through June 30, 2023.

**Fidelity® NASDAQ Composite Index®** Fidelity Management & Research Company LLC (FMR) has contractually agreed to reimburse the fund to the extent that total operating expenses (excluding interest, certain taxes, fees and expenses of the Independent Trustees, proxy and shareholder meeting expenses, extraordinary expenses, and acquired fund fees and expenses, if any, as well as non-operating expenses such as brokerage commissions and fees and expenses associated with the fund's securities lending program, if applicable), as a percentage of its average net assets, exceed 0.29% (the Expense Cap). If at any time during the current fiscal year expenses for the fund fall below the Expense Cap. FMR reserves the right to recoup through the end of the fiscal year any expenses that were reimbursed during the current fiscal year up to, but not in excess of, the Expense Cap. This arrangement will remain in effect through March 31, 2022

**TIAA-CREF Equity Index W** Teachers Advisors, LLC has contractually agreed to waive and/or reimburse Class W's Management fees and Other expenses (excluding interest, taxes, brokerage commissions or other transactional expenses, Acquired fund fees and expenses, Trustee expenses and extraordinary expenses) in their entirety. Teachers Advisors, LLC expects these waiver and/or reimbursement arrangements to remain in effect indefinitely, unless changed or terminated with approval of the Board of Trustees.

The Fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Fi360 Fiduciary Score® Average is a one-, three-, five-, or ten-year rolling average of an investment's Fi360 Fiduciary Score®. All Scores are color coded based on the quartile they fall in (1st - Green; 2nd - Light Green; 3rd - Yellow; 4th - Red). The composition and style criteria may be excluded in the table above due to the investment's peer group. Investments without the required inception date (3 years) will not receive a Fiduciary Score.

## GROWTH OF 10K

This graph shows a fund's performance based on how \$10,000 invested in the fund would have grown over time with dividends reinvested. The returns used in the graph are not load-adjusted. The growth of \$10,000 begins at the fund's inception, or the first year listed on the graph, whichever is appropriate. Located alongside the fund's graph line are lines that represent the growth of \$10,000 in the fund's Broad Index, Peer Group Index, and Best-fit Index Benchmarks, which are listed in the Benchmarks section. All lines are plotted on a logarithmic scale, so that identical percentage changes in the value of an investment have the same vertical distance on the graph. This provides a more accurate representation of performance than would a simple arithmetic graph.

## INVESTMENT STRATEGY

The investment seeks growth, income and conservation of capital. The fund normally invests a greater portion of its assets in fixed income, equity-income and balanced funds as it continues past its target date. The advisor attempts to achieve its investment objectives by investing in a mix of American Funds in different combinations and weightings. The underlying American Funds represent a variety of fund categories, including growth funds, growth-and-income funds, equity-income funds, balanced funds and fixed income funds. The fund categories represent differing investment objectives and strategies.

## HISTORICAL Fi360 FIDUCIARY SCORES AT QUARTER END

The Fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Fi360 Fiduciary Score® Average is a one-, three-, five-, or ten-year rolling average of an investment's Fi360 Fiduciary Score®. All Scores are color coded based on the quartile they fall in (1st - Green; 2nd - Light Green; 3rd - Yellow; 4th - Red). Any cells shaded in yellow below accrued Fi360 Fiduciary Score shortfall points during that quarter.

## GROWTH OF 10K

This graph shows a fund's performance based on how \$10,000 invested in the fund would have grown over time with dividends reinvested. The returns used in the graph are not load-adjusted. The growth of \$10,000 begins at the fund's inception, or the first year listed on the graph, whichever is appropriate. Located alongside the fund's graph line are lines that represent the growth of \$10,000 in the fund's Broad Index, Peer Group Index, and Best-fit Index Benchmarks, which are listed in the Benchmarks section. All lines are plotted on a logarithmic scale, so that identical percentage changes in the value of an investment have the same vertical distance on the graph. This provides a more accurate representation of performance than would a simple arithmetic graph.

## INVESTMENT STRATEGY

The investment seeks growth, income and conservation of capital. The fund normally invests a greater portion of its assets in fixed income, equity-income and balanced funds as it approaches and passes its target date. The advisor attempts to achieve its investment objectives by investing in a mix of American Funds in different combinations and weightings. The underlying American Funds represent a variety of fund categories, including growth funds, growth-and-income funds, equity-income funds, balanced funds and fixed income funds. The fund categories represent differing investment objectives and strategies.

## HISTORICAL Fi360 FIDUCIARY SCORES AT QUARTER END

The Fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Fi360 Fiduciary Score® Average is a one-, three-, five-, or ten-year rolling average of an investment's Fi360 Fiduciary Score®. All Scores are color coded based on the quartile they fall in (1st - Green; 2nd - Light Green; 3rd - Yellow; 4th - Red). Any cells shaded in yellow below accrued Fi360 Fiduciary Score shortfall points during that quarter.

The Fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Fi360 Fiduciary Score® Average is a one-, three-, five-, or ten-year rolling average of an investment's Fi360 Fiduciary Score®. All Scores are color coded based on the quartile they fall in (1st - Green; 2nd - Light Green; 3rd - Yellow; 4th - Red). The composition and style criteria may be excluded in the table above due to the investment's peer group. Investments without the required inception date (3 years) will not receive a Fiduciary Score.

## GROWTH OF 10K

This graph shows a fund's performance based on how \$10,000 invested in the fund would have grown over time with dividends reinvested. The returns used in the graph are not load-adjusted. The growth of \$10,000 begins at the fund's inception, or the first year listed on the graph, whichever is appropriate. Located alongside the fund's graph line are lines that represent the growth of \$10,000 in the fund's Broad Index, Peer Group Index, and Best-fit Index Benchmarks, which are listed in the Benchmarks section. All lines are plotted on a logarithmic scale, so that identical percentage changes in the value of an investment have the same vertical distance on the graph. This provides a more accurate representation of performance than would a simple arithmetic graph.

## INVESTMENT STRATEGY

The investment seeks growth, income and conservation of capital. The fund normally invests a greater portion of its assets in fixed income, equity-income and balanced funds as it approaches and passes its target date. The advisor attempts to achieve its investment objectives by investing in a mix of American Funds in different combinations and weightings. The underlying American Funds represent a variety of fund categories, including growth funds, growth-and-income funds, equity-income funds, balanced funds and fixed income funds. The fund categories represent differing investment objectives and strategies.

## GROWTH OF 10K

This graph shows a fund's performance based on how \$10,000 invested in the fund would have grown over time with dividends reinvested. The returns used in the graph are not load-adjusted. The growth of \$10,000 begins at the fund's inception, or the first year listed on the graph, whichever is appropriate. Located alongside the fund's graph line are lines that represent the growth of \$10,000 in the fund's Broad Index, Peer Group Index, and Best-fit Index Benchmarks, which are listed in the Benchmarks section. All lines are plotted on a logarithmic scale, so that identical percentage changes in the value of an investment have the same vertical distance on the graph. This provides a more accurate representation of performance than would a simple arithmetic graph.

## HISTORICAL Fi360 FIDUCIARY SCORES AT QUARTER END

The Fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Fi360 Fiduciary Score® Average is a one-, three-, five-, or ten-year rolling average of an investment's Fi360 Fiduciary Score®. All Scores are color coded based on the quartile they fall in (1st - Green; 2nd - Light Green; 3rd - Yellow; 4th - Red). Any cells shaded in yellow below accrued Fi360 Fiduciary Score shortfall points during that quarter.

## Fi360 FIDUCIARY SCORE® BREAKDOWN

The Fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Fi360 Fiduciary Score® Average is a one-, three-, five-, or ten-year rolling average of an investment's Fi360 Fiduciary Score®. All Scores are color coded based on the quartile they fall in (1st - Green; 2nd - Light Green; 3rd - Yellow; 4th - Red).

### Score Criterion

- IN. Inception Date.** Must have at least a 3 year track history  
**MT. Manager Tenure.** Must have at least a 2 year track history. (Most senior manager's tenure)  
**NA. Net Assets.** Must have >= 75 million under management. (Total across all share classes)  
**CO. Composition.** Must have >= 80% allocation to primary asset (Not applied to all peer groups)  
**SS. Style.** Must have current style box match the peer group. (Not applied to all peer groups)  
**ER. Prospectus Net Exp Ratio.** \* Must place in the top 75% of its peer group.  
**A3. Alpha - Broad Market (3 YR).** Must place in the top 50% of its peer group.  
**S3. Sharpe (3 YR).** Must place in the top 50% of its peer group.  
**R1. Return (1 YR).** Must place in the top 50% of its peer group.  
**R3. Return (3 YR).** Must place in the top 50% of its peer group.  
**R5. Return (5 YR).** Must place in the top 50% of its peer group.

### Summary Legend

✓	Investment meets the criterion
✗	Investment does not meet the criterion
-	Investment data is not available
NA	Investment is not screened on the criterion

\* For separately managed accounts, r-squared in the top 75% of it's peer group is used as a replacement criterion for Exp Ratio.

## Fi360 FIDUCIARY SCORE® SUMMARY

The Fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Fi360 Fiduciary Score® Average is a one-, three-, five-, or ten-year rolling average of an investment's Fi360 Fiduciary Score®. All Scores are color coded based on the quartile they fall in (1st - Green; 2nd - Light Green; 3rd - Yellow; 4th - Red).

The ID column can be used to reference the investment on the following Scatterplot chart. Investments which do not have both Scores will not have an ID as they cannot be plotted on the chart. If multiple investments have the same Scores, they will be plotted together under 1 ID.

## Fi360 FIDUCIARY SCORE® SUMMARY

The chart plots each investment using the selected Fi360 Fiduciary Scores. Investments without both Scores will be excluded from the chart. Green, yellow and red lines are drawn to highlight the different Fi360 Fiduciary Score quartiles. Investments in the bottom left corner of the chart are most preferred.

If \$ asset amounts are included, bubble sizes are based on the relative percentage invested in that investment. Bubble numbers refer to the ID's on the previous page(s). If multiple investments have the same Scores, they will be plotted together under 1 ID.

## INVESTMENT COMPARISON

The Fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Fi360 Fiduciary Score® Average is a one-, three-, five-, or ten-year rolling average of an investment's Fi360 Fiduciary Score®. All Scores are color coded based on the quartile they fall in (1st - Green; 2nd - Light Green; 3rd - Yellow; 4th - Red).

**Mutual funds and Exchange Traded Funds (ETFs) are sold by prospectus. Please consider the investment objectives, risks, charges and expenses carefully before investing. The prospectus, and, if available, the summary prospectus, which contains this and other information, can be obtained by calling your financial advisor. Read the prospectus and, if available, the summary prospectus carefully before you invest.** The performance information shown represents past performance and is not a guarantee of future results. Investment returns and principal value of an investment will fluctuate so that when shares are redeemed, they may be worth more or less than their original cost. The performance information shown reflects performance without adjusting for sales charges. If adjusted, the load would reduce the performance quoted. Current performance may be higher or lower than the data shown. For the most recent month-end performance and information on expenses, visit [www.fi360.com/directory](http://www.fi360.com/directory). Percentile ranks calculated by Fi360, are based on the return shown compared to peer group (1 = top rank), do not account for sales charges, and are not provided for periods under a year.

## INVESTMENT COMPARISON

The Fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Fi360 Fiduciary Score® Average is a one-, three-, five-, or ten-year rolling average of an investment's Fi360 Fiduciary Score®. All Scores are color coded based on the quartile they fall in (1st - Green; 2nd - Light Green; 3rd - Yellow; 4th - Red).

## INVESTMENT DESCRIPTIONS

**American Century Sustainable Equity I** P. The investment seeks long-term capital growth; income is a secondary objective. The fund will generally invest in large capitalization companies the advisor believes show sustainable business improvement using a proprietary multi-factor model that combines fundamental measures of a stock's value and growth potential with ESG metrics. The model assigns each security a financial metrics score and an ESG score that are combined to create an overall score. To measure growth, the managers may use the rate of growth of a company's earnings and cash flow and changes in its earnings estimates.

**American Funds 2020 Trgt Date Retire R6** W. The investment seeks growth, income and conservation of capital. The fund normally invests a greater portion of its assets in fixed income, equity-income and balanced funds as it continues past its target date. The advisor attempts to achieve its investment objectives by investing in a mix of American Funds in different combinations and weightings. The underlying American Funds represent a variety of fund categories, including growth funds, growth-and-income funds, equity-income funds, balanced funds and fixed income funds. The fund categories represent differing investment objectives and strategies.

**American Funds 2025 Trgt Date Retire R6**. The investment seeks growth, income and conservation of capital. The fund normally invests a greater portion of its assets in fixed income, equity-income and balanced funds as it approaches and passes its target date. The advisor attempts to achieve its investment objectives by investing in a mix of American Funds in different combinations and weightings. The underlying American Funds represent a variety of fund categories, including growth funds, growth-and-income funds, equity-income funds, balanced funds and fixed income funds. The fund categories represent differing investment objectives and strategies.

**American Funds 2030 Trgt Date Retire R6**. The investment seeks growth, income and conservation of capital. The fund normally invests a greater portion of its assets in fixed income, equity-income and balanced funds as it approaches and passes its target date. The advisor attempts to achieve its investment objectives by investing in a mix of American Funds in different combinations and weightings. The underlying American Funds represent a variety of fund categories, including growth funds, growth-and-income funds, equity-income funds, balanced funds and fixed income funds. The fund categories represent differing investment objectives and strategies.

**American Funds 2035 Trgt Date Retire R6**. The investment seeks growth, income and conservation of capital. The fund normally invests a greater portion of its assets in fixed income, equity-income and balanced funds as it approaches and passes its target date. The advisor attempts to achieve its investment objectives by investing in a mix of American Funds in different combinations and weightings. The underlying American Funds represent a variety of fund categories, including growth funds, growth-and-income funds, equity-income funds, balanced funds and fixed income funds. The fund categories represent differing investment objectives and strategies.

**American Funds 2040 Trgt Date Retire R6** W. The investment seeks growth, income and conservation of capital. The fund normally invests a greater portion of its assets in fixed income, equity-income and balanced funds as it approaches and passes its target date. The advisor attempts to achieve its investment objectives by investing in a mix of American Funds in different combinations and weightings. The underlying American Funds represent a variety of fund categories, including growth funds, growth-and-income funds, equity-income funds, balanced funds and fixed income funds. The fund categories represent differing investment objectives and strategies.

**American Funds 2045 Trgt Date Retire R6** W. The investment seeks growth, income and conservation of capital. The fund normally invests a greater portion of its assets in fixed income, equity-income and balanced funds as it approaches and passes its target date. The advisor attempts to achieve its investment objectives by investing in a mix of American Funds in different combinations and weightings. The underlying American Funds represent a variety of fund categories, including growth funds, growth-and-income funds, equity-income funds, balanced funds and fixed income funds. The fund categories represent differing investment objectives and strategies.

**American Funds 2050 Trgt Date Retire R6** W. The investment seeks growth, income and conservation of capital. The fund normally invests a greater portion of its assets in fixed income, equity-income and balanced funds as it approaches and passes its target date. The advisor attempts to achieve its investment objectives by investing in a mix of American Funds in different combinations and weightings. The underlying American Funds represent a variety of fund categories, including growth funds, growth-and-income funds, equity-income funds, balanced funds and fixed income funds. The fund categories represent differing investment objectives and strategies.

**American Funds 2055 Trgt Date Retire R6** W. The investment seeks growth, income and conservation of capital. The fund normally invests a greater portion of its assets in fixed income, equity-income and balanced funds as it approaches and passes its target date. The advisor attempts to achieve its investment objectives by investing in a mix of American Funds in different combinations and weightings. The underlying American Funds represent a variety of fund categories, including growth funds, growth-and-income funds, equity-income funds, balanced funds and fixed income funds. The fund categories represent differing investment objectives and strategies.

## INVESTMENT DESCRIPTIONS

**American Funds 2060 Trgt Date Retire R6** W. The investment seeks growth, income and conservation of capital. The fund normally invests a greater portion of its assets in fixed income, equity income and balanced funds as it approaches and passes its target date. The advisor attempts to achieve its investment objectives by investing in a mix of American Funds in different combinations and weightings. The underlying American Funds represent a variety of fund categories, including growth funds, growth-and-income funds, equity-income funds, balanced funds and fixed income funds. The fund categories represent differing investment objectives and strategies.

**Ariel Fund Institutional** P. The investment seeks long-term capital appreciation. The fund invests in small/mid cap undervalued companies that show strong potential for growth. It invests primarily in equity securities of U.S. companies that have market capitalizations within the range of the companies in the Russell 2500TM Index, measured at the time of initial purchase.

**Baillie Gifford Global Alpha Equities 3**. The investment seeks capital appreciation. Under normal circumstances, the fund invests at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities. It invests predominantly in a diversified portfolio of securities issued by companies located in countries represented in the MSCI ACWI Index, cash and cash equivalents. The fund invests in companies whose principal activities are in the U.S., Canada, Latin America, Europe, Australasia, Africa, the Middle East and/or the Far East.

**Baron Discovery R6**. The investment seeks capital appreciation through investments primarily in securities of small-sized growth companies. The fund is a diversified fund that invests for the long term primarily in equity securities in the form of common stock of U.S. small-sized growth companies. The Adviser seeks to invest in businesses the advisor believes have significant opportunities for growth, sustainable competitive advantages, exceptional management, and an attractive valuation.

**BlackRock Advantage Small Cap Core Instl**. The investment seeks capital appreciation over the long term. Under normal circumstances, the fund seeks to invest at least 80% of its net assets plus any borrowings for investment purposes in equity securities or other financial instruments that are components of, or have market capitalizations similar to, the securities included in the Russell 2000® Index. It primarily seeks to buy common stock and may also invest in preferred stock and convertible securities. From time to time the fund may invest in shares of companies through "new issues" or initial public offerings ("IPOs").

**BlackRock Mid-Cap Growth Equity Instl**. The investment seeks long-term capital appreciation. The fund normally invests at least 80% of its net assets in equity securities issued by U.S. mid-capitalization companies which the fund management believes have above-average earnings growth potential. The fund adviser generally defines these companies, at the time of the fund's investment, as those with market capitalizations comparable in size to the companies in the Russell Midcap® Growth Index. It primarily invests in common stock but also can invest in preferred stock, convertible securities and other equity securities.

**Fidelity® NASDAQ Composite Index®**. The investment seeks to provide investment returns that closely correspond to the price and yield performance of the Nasdaq Composite Index ®. The fund normally invests at least 80% of assets in common stocks included in the index. It uses statistical sampling techniques that take into account such factors as capitalization, industry exposures, dividend yield, price/earnings (P/E) ratio, price/book (P/B) ratio, and earnings growth to create a portfolio of securities listed in the index that have a similar investment profile to the entire index. The fund lends securities to earn income for the fund.

**Fidelity® Series Investment Grade Bond**. The investment seeks a high level of current income. The fund normally invests at least 80% of assets in investment-grade debt securities (those of medium and high quality) of all types and repurchase agreements for those securities. Its manager manages the fund to have similar overall interest rate risk to the Bloomberg U.S. Aggregate Bond Index. The fund allocates assets across different market sectors and maturities. It invests in domestic and foreign issuers.

**Hartford Total Return Bond F**. The investment seeks a competitive total return, with income as a secondary objective. The fund invests at least 80% of its assets in bonds that the sub-adviser considers to be attractive from a total return perspective along with current income. It may invest up to 20% of its net assets in securities rated below investment grade (also known as "junk bonds").

**Invesco American Value R** W. The investment seeks long-term capital appreciation. The fund invests, under normal circumstances, at least 80% of its net assets (plus any borrowings for investment purposes) in securities of U.S. issuers, and in derivatives and other instruments that have economic characteristics similar to such securities. It normally invests at least 65% of its net assets in equity securities of mid-capitalization companies. The fund may invest up to 20% of its net assets in real estate investment trusts (REITs).

**Invesco QQQ Trust** P. The investment seeks investment results that generally correspond to the price and yield performance of the NASDAQ-100 Index®. To maintain the correspondence between the composition and weights of the securities in the trust (the "securities") and the stocks in the

## INVESTMENT DESCRIPTIONS

NASDAQ-100 Index®, the adviser adjusts the securities from time to time to conform to periodic changes in the identity and/or relative weights of index securities. The composition and weighting of the securities portion of a portfolio deposit are also adjusted to conform to changes in the index.

**Principal Stable Value Z.** The Fund primarily consists of a diversified portfolio of Stable Value Investment Contracts (Investment Contracts) issued by life insurance companies, banks and other financial institutions, the performance of which may be predicated on underlying fixed income investments. The principal value of these assets is designed to remain stable regardless of stock and bond market fluctuations. The Fund is typically appropriate for investors who desire low volatility, stable principal value, and returns commensurate with a capital preservation objective for a component of their retirement savings. The Fund is designed for long-term retirement investing.

**TIAA-CREF Equity Index W.** The investment seeks a favorable long-term total return, mainly through capital appreciation, by investing primarily in a portfolio of equity securities selected to track the overall U.S. equity markets based on a market index. Under normal circumstances, the fund invests at least 80% of its assets in equity securities of its benchmark index, the Russell 3000® Index. It buys most, but not necessarily all, of the stocks in its benchmark index, and the advisor will attempt to closely match the overall investment characteristics of its benchmark index.

**Vanguard Global Equity Inv.** The investment seeks long-term capital appreciation. The fund invests primarily in U.S. and foreign equity securities chosen mainly on the basis of bottom-up stock analysis. It typically invests across a wide range of industries, and its holdings are expected to represent a mix of value and growth stocks, as well as a mix of developed and emerging markets stocks, across the capitalization spectrum. Under normal circumstances, at least 80% of the fund's assets will be invested in equity securities. The fund uses multiple investment advisors. Each advisor independently selects and maintains a portfolio of common stocks and other investments for the fund.

**Vanguard Total Stock Mkt Idx Instl Pls.** The investment seeks to track the performance of the CRSP US Total Market Index that measures the investment return of the overall stock market. The fund employs an indexing investment approach designed to track the performance of the index, which represents approximately 100% of the investable U.S. stock market and includes large-, mid-, small-, and micro-cap stocks regularly traded on the New York Stock Exchange and Nasdaq. It invests by sampling the index, meaning that it holds a broadly diversified collection of securities that, in the aggregate, approximates the full index in terms of key characteristics.

## INVESTMENT SNAPSHOT

The Fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Fi360 Fiduciary Score® Average is a one-, three-, five-, or ten-year rolling average of an investment's Fi360 Fiduciary Score®. All Scores are color coded based on the quartile they fall in (1st - Green; 2nd - Light Green; 3rd - Yellow; 4th - Red).

**Mutual funds and Exchange Traded Funds (ETFs) are sold by prospectus. Please consider the investment objectives, risks, charges and expenses carefully before investing. The prospectus, and, if available, the summary prospectus, which contains this and other information, can be obtained by calling your financial advisor. Read the prospectus and, if available, the summary prospectus carefully before you invest.** The performance information shown represents past performance and is not a guarantee of future results. Investment returns and principal value of an investment will fluctuate so that when shares are redeemed, they may be worth more or less than their original cost. The performance information shown reflects performance without adjusting for sales charges. If adjusted, the load would reduce the performance quoted. Current performance may be higher or lower than the data shown. For the most recent month-end performance and information on expenses, visit [www.fi360.com/directory](http://www.fi360.com/directory). Percentile ranks calculated by Fi360, are based on the return shown compared to peer group (1 = top rank), do not account for sales charges, and are not provided for periods under a year.

Investment and insurance products: NOT FDIC-INSURED / NO Bank Guarantee / MAY Lose Value

## IPS ALLOCATION ALIGNMENT

This section displays the peer groups specified in the Investment Policy Statement (IPS). If the current holdings do not match the IPS, an alignment notice is displayed. This can occur due to temporary style drift in an investment, a difference in categorization methodology or a gap in allocation.

### U.S. EQUITY

## MARKET PERFORMANCE OVERVIEW

**Mutual funds and Exchange Traded Funds (ETFs) are sold by prospectus. Please consider the investment objectives, risks, charges and expenses carefully before investing. The prospectus, and, if available, the summary prospectus, which contains this and other information, can be obtained by calling your financial advisor. Read the prospectus and, if available, the summary prospectus carefully before you invest.** The performance information shown represents past performance for the median mutual fund/ETF manager in each peer group and is not a guarantee of future results. Investment returns and principal value of an investment will fluctuate so that when shares are redeemed, they may be worth more or less than their original cost. The performance information shown reflects performance without adjusting for sales charges. If adjusted, the load would reduce the performance quoted. Current performance may be higher or lower than the data shown. For the most recent month-end performance, visit [www.fi360.com/directory](http://www.fi360.com/directory).

For each period, the top 3 performing peer groups will be colored in shades of green. The bottom 3 peer groups will be colored in shades of blue.

## SHARE CLASS COMPARISON

This section displays a table for each mutual fund/ETF investment. Your selected share class(es) are colored in a blue background and any other related share classes will be displayed for analysis. Depending on the platform you are using and the amount of money you have to invest, a given share class may not be available. Consult your advisor for additional details.

The Fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Fi360 Fiduciary Score® Average is a one-, three-, five-, or ten-year rolling average of an investment's Fi360 Fiduciary Score®. All Scores are color coded based on the quartile they fall in (1st - Green; 2nd - Light Green; 3rd - Yellow; 4th - Red).

**Mutual funds and Exchange Traded Funds (ETFs) are sold by prospectus. Please consider the investment objectives, risks, charges and expenses carefully before investing. The prospectus, and, if available, the summary prospectus, which contains this and other information, can be obtained by calling your financial advisor. Read the prospectus and, if available, the summary prospectus carefully before you invest.** The performance information shown represents past performance and is not a guarantee of future results. Investment returns and principal value of an investment will fluctuate so that when shares are redeemed, they may be worth more or less than their original cost. The performance information shown reflects performance without adjusting for sales charges. If adjusted, the load would reduce the performance quoted. Current performance may be higher or lower than the data shown. For the most recent month-end performance and information on expenses, visit [www.fi360.com/directory](http://www.fi360.com/directory). Percentile ranks calculated by Fi360, are based on the return shown compared to peer group (1 = top rank), do not account for sales charges, and are not provided for periods under a year.

## STANDARDIZED PERFORMANCE DISCLOSURE

**Standardized Returns for the quarter-ended 12/31/2021.** Returns for periods of less than one year are not annualized. Standardized returns assume reinvestment of dividends and capital gains. It depicts performance without adjusting for the effects of taxation, but are adjusted to reflect sales charges and ongoing fund expenses. If adjusted for taxation, the performance quoted would be significantly reduced. Any sales charge used in the calculation was obtained from the fund's most recent prospectus and/or shareholder report. If sales charges are waived (for example, for investors in a qualified retirement plan), the performance numbers may be higher. Please contact your financial advisor for further information on whether loads are waived on the investment options in your account.

**Mutual funds and Exchange Traded Funds (ETFs) are sold by prospectus. Please consider the investment objectives, risks, charges and expenses carefully before investing. The prospectus, and, if available, the summary prospectus, which contains this and other information, can be obtained by calling your financial advisor. Read the prospectus and, if available, the summary prospectus carefully before you invest.** The performance information shown represents past performance and is not a guarantee of future results. Investment returns and principal value of an investment will fluctuate so that when shares are redeemed, they may be worth more or less than their original cost. Current performance may be higher or lower than the data shown. For the most recent month-end performance and information on expenses, visit [www.fi360.com/directory](http://www.fi360.com/directory).

For ETFs, the market price used to calculate the Market Value (MKT) return is the midpoint between the highest bid and the lowest offer on the exchange on which the shares of the Fund are listed for trading, as of the time the Fund's NAV is calculated. Whatever day traded, the price of the shares may differ, higher or lower, than the NAV on that day. If you trade your shares at another time, your return may differ.

Investment and insurance products: NOT FDIC-INSURED / NO Bank Guarantee / MAY Lose Value

## INVESTMENTS TO WATCH

The Fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. All Scores are color coded based on the quartile they fall in (1st - Green; 2nd - Light Green; 3rd - Yellow; 4th - Red).

## STYLE SUMMARY

This section groups each investment into a style category. The top charts show the number of investments grouped by their current Morningstar Style Box™. The bottom tables include investments within other style categories based on their current peer group. The Morningstar Style Box™ is a nine-square grid that provides a graphical representation of the investment style of mutual funds, exchange traded funds, group retirement plan annuities, variable annuity sub-accounts and separately managed accounts. US and International equities are classified according to market capitalization (the vertical axis) and growth and value factors (the horizontal axis). Fixed income funds are classified according to credit quality of the long bonds owned (the vertical axis) and interest rate sensitivity as measured by a bond's effective duration (the horizontal axis).

## WATCH LIST BREAKDOWN

Each investment will be evaluated against the watch list criteria applicable to it's investment type (active, passive, target date or money market/stable value). Any groups within the criteria will be displayed along with the respective number of criteria needed to pass within that group. Within each group, the data point(s) being evaluated and the threshold the investment is being compared against will be shown for the last 12 quarterly time periods. Any historical periods not included in the current watch list analysis will be shown with a gray background and are for informational purposes only. All scored periods will be shown with a white background and either green or red font depending on whether it passed or failed the threshold. The total number of scored periods which passed the threshold will be shown in green or red background according to the quantity the criteria required. Finally, the investment's overall watch list status (on/off) based on the criteria and any qualitative decisions is shown in the top right of each investment table.

## WATCH LIST SUMMARY

Each investment will be evaluated against the watch list criteria applicable to its investment type (active, passive, target date or money market/stable value). Each criteria section outlines the investment type(s) it is applied against along with the data points being evaluated and their corresponding thresholds. Any groups within the criteria will be displayed along with the respective number of criteria needed to pass within that group. The criteria label can be used as quick reference when looking at the subsequent investment table which will display a ✓ or ✗ for each criteria. Also, within the investment table, the number of passed criteria for each required (REQ) and/or flexible (FLEX) group will be displayed. Finally, the status column in the investment table indicates the overall watch list status for the investment based on the criteria and any qualitative decisions.

## CRITERIA FOR: ACTIVE, MONEY MARKET/STABLE VALUE

All of the following criteria are required for the investment to pass (REQ):

LABEL	DATA POINT
FS	Fi360 Fiduciary Score® Is In The Top 50 Percent Of Peer Group; Must Pass 1 Of The Last 1 Periods

## CLIENT PERFORMANCE SUMMARY: USING HYPOTHETICAL ALLOCATIONS

The performance information shown represents past performance and is not a guarantee of future results. Investment returns and principal value of an investment will fluctuate so that when shares are redeemed, they may be worth more or less than their original cost. Current performance may be higher or lower than the data shown. **Please reference the Statement of Additional Disclosures for additional details concerning the calculation methodology.**

## HOLDINGS HISTORY

Based on the historical records available in Fi360, the following table will display up to three years of history for your investments. If an investment did not exist in your account during a given period, there will be an empty box. If the investment did exist, but there was no action for that period, the standard dash will be displayed ie: -. Otherwise, you will see the investment's action selected for that period.

## INVESTMENT PERFORMANCE AND EXPENSE SUMMARY

**Mutual funds and Exchange Traded Funds (ETFs) are sold by prospectus. Please consider the investment objectives, risks, charges and expenses carefully before investing. The prospectus, and, if available, the summary prospectus, which contains this and other information, can be obtained by calling your financial advisor. Read the prospectus and, if available, the summary prospectus carefully before you invest.** The performance information shown represents past performance and is not a guarantee of future results. Investment returns and principal value of an investment will fluctuate so that when shares are redeemed, they may be worth more or less than their original cost. The performance information shown reflects performance without adjusting for sales charges. If adjusted, the load would reduce the performance quoted. Current performance may be higher or lower than the data shown. For the most recent month-end performance and information on expenses, visit [www.fi360.com/directory](http://www.fi360.com/directory) for a directory of websites and phone numbers or use the specific fund website/phone if available below. Index returns represent the performance of market indices, which cannot be invested in directly, and are shown for comparative purposes only.

## FI360 FIDUCIARY SCORE OVERVIEW

### Fi360 Fiduciary Score®

*Fiduciary Due Diligence Process*

The Fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. It helps quickly identify a short list of investments during the selection process. It also facilitates the ongoing monitoring process by highlighting investments that exhibit potential deficiencies.

### FI360 FIDUCIARY SCORE® CRITERIA

**Regulatory Oversight** The investment should be managed by a bank, trust company, or an insurance company, a registered investment company (mutual fund), or a registered investment advisor.

**Minimum Track Record** The investment should have at least three years of history.

**Stability of the Organization** The longest reported manager's tenure should be at least two years.

**Assets in the Investment** The investment should have at least \$75 million AUM (across all share classes).

**Composition Consistent with Asset Class** At least 80 percent of the investment's underlying securities should be consistent with the broad asset class.

**Style Consistency** The investment should be highly correlated to the asset class of the investment option, e.g., the Morningstar Style Box™ must match the peer group of the investment.

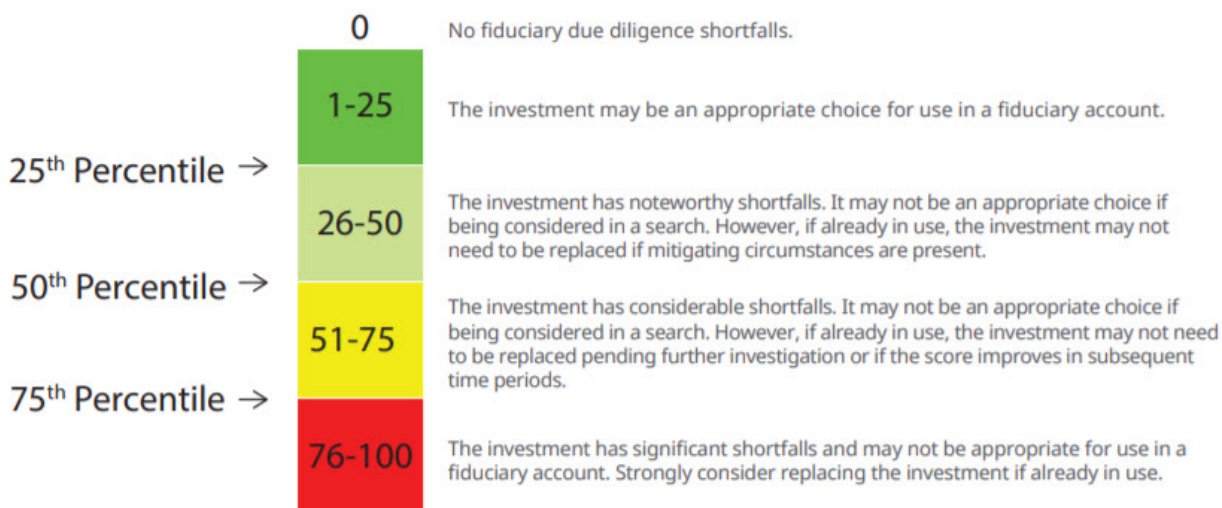

**Expense Ratios/Fees Relative to Peers** The investment's fees should not be in the bottom quartile (most expensive) of their peer group.

**Risk-Adjusted Performance Relative to Peers** The investment's risk-adjusted performance should be above the peer group median manager's risk-adjusted performance.

**Performance Relative to Peers** The investment's performance should be above the peer group's median manager return for 1-, 3- and 5-year cumulative periods.

### CALCULATING THE FI360 FIDUCIARY SCORE®:

The Fi360 Fiduciary Score® is calculated on a monthly basis for investments with at least a three-year history. Each investment is evaluated against a set of factors and thresholds, then allotted penalty points. The penalty points are totaled and compared to all other investments within the peer group. Investments with 0 penalty points are automatically given an Fi360 Fiduciary Score of 0. Every other investment is then given a score of 1-100, representing their percent ranking based on its placement in the distribution of their peer group.

## Q1 2021 FIDUCIARY NEWS

### Legislative Update from Capitol Hill

**Retirement Plans.** Late last year, House Ways and Means Committee Chairman Richard E. Neal (D-Mass.) and Ranking Member Kevin Brady (R-Tex.) introduced the Securing a Strong Retirement Act of 2020 (SECURE 2.0), a bipartisan legislative proposal that includes changes designed to encourage plan adoption, promote retirement savings, and fix certain plan administration problems. Fi360 expects it to be re-introduced in largely the same form this year, and receive substantial bipartisan support in both chambers.

At its core, SECURE 2.0 seeks to expand retirement plan coverage to more workers in three ways: by mandating auto-enrollment in 401(k), 403(b) and SIMPLE plans; allowing long-term, part-time workers to qualify for participation in plans after two rather than three years; and giving employers more tools to encourage savings by their workers.

Other items likely to be included in the final legislation are options allowing employees to make student loan payments in lieu of retirement account contributions while still receiving the employer's match. In addition, another likely provision would create a 'lost-and-found' clearinghouse to help workers keep track of their retirement accounts after changing jobs.

A bipartisan Senate counterpart to the House bill, also introduced last year, is expected to be re-introduced in the near future. It would include many of the same components of the House bill. Both could see legislative action later this year.

### U.S. Department of Labor

**Cybersecurity Guidance.** Following up on [a recommendation](#) by Congress's independent audit arm, the General Accountability Office (GAO), the DOL in April released a series of best practices for plan sponsors to consider in mitigating cyber-theft of plan assets and workers' personal information. The DOL's subagency that oversees private sector plans, the Employee Benefits Security Administration (EBSA), noted, among other recommendations, that plan fiduciaries have an obligation to minimize cybersecurity risks.

Currently liability in the event of a cybersecurity breach is unclear. Although plan sponsors have always been considered ERISA fiduciaries with ultimate responsibility for protecting client assets, courts are still sorting out whether a plan's service providers may share or be held responsible in the event of a theft.

For example, last year a federal court in Illinois held in *Bartnett v. Abbott Labs* that Abbott, the plan sponsor, was not responsible for the theft from a participant's account when the third-party administrator, Alight Solutions, mistakenly disbursed \$245,000 to a cyber-hacker who allegedly accessed the account and changed the direct deposit account information. The case against Abbott was dismissed on a finding that the plan sponsor did not act imprudently in hiring Alight. An amended complaint filed against Alight was pending as of early February 2021.

## Q1 2021 FIDUCIARY NEWS

EBSA has made the following materials available for downloading:

- [Cybersecurity Program Best Practices](#)
- [Tips for Hiring a Service Provider](#), and
- [Online Security Tips](#) for participants and beneficiaries

**ESG Rule.** The Biden Administration announced in late March that it would not pursue enforcement actions for violation of an ESG rule approved by the Trump Administration that took effect January 12, 2021.

"We intend to conduct significantly more stakeholder outreach to determine how to craft rules that better recognize the important role that environmental, social and governance integration can play in the evaluation and management of plan investments," EBSA Principal Deputy Assistant Secretary Ali Khawar [said in a statement](#) March 10, 2021.

The [rule in question](#), previously approved by EBSA October 30, 2020, would have required plan sponsors to select investments for plan menus based solely on how the investments would affect the financial interests of plan participants – not so-called "non-pecuniary factors" that ostensibly may include environmental, social or governance (ESG) issues. The rule also required plans with an ESG option that serves as a qualified default investment alternative, defined by the rule as a product that considers or indicates the use of "one or more non-pecuniary factors," to remove it by April 30, 2022. However, the rule does not apply retroactively to existing ESG-type investments on a plan menu.

Plan sponsors should keep in mind that while the new Administration has effectively discarded the rule, technically speaking it remains in effect until changes are made in a formal rulemaking or in other regulatory guidance. This means private litigants could still base a claim on any alleged violations until that time.

Fi360 anticipates that further clarifications regarding prudent selection and monitoring of ESG options will likely be addressed by EBSA in the near future – possibly in 2022 – after an assistant secretary for the agency is nominated and confirmed by the Senate.

**Voluntary Fiduciary Correction Program.** EBSA earlier this year announced a series of online events will be held regarding use of its Voluntary Fiduciary Correction Program (VFCP). The webinars are sponsored by its New York regional office and are open to plan sponsors and other plan officials to better understand how to make corrections under the VFCP program. Pre-registration is required by emailing [Allende.Barbara@dol.gov](mailto:Allende.Barbara@dol.gov) or calling Ms. Allende for more information at (212)607-8689. 2021 events are scheduled on the following dates:

Q1 2021 FIDUCIARY NEWS

---

May 5, May 20

June 3, June 17

July 1, July 22

Aug. 5, Aug. 19

Sept. 2, Sept. 16

**State Activity**

**State Auto-IRAs.** The Biden Administration in late February backed out of a years-long battle over California's so-called "Auto-IRA" program that requires employers without an ERISA retirement plan to default workers into a state-managed IRA program. The lawsuit challenging California's program claims it should be subject to ERISA and was previously supported by the Trump Administration in court. Eleven other states and the city of Seattle have enacted similar savings programs since 2012. The program is similar to what the Biden Administration is expected to press Congress to adopt on the federal level and make available to all U.S. workers without 401(k)-type plans.

**ERISA Litigation Update**

**Latest ERISA Class-Action Filings Have Slowed in 2021.** Eleven proposed class-action lawsuits were filed against 401(k) plan sponsors in Q1, or nearly one per week – far behind the pace of 1.7 complaints per week filed on average in 2020. Plans targeted this year, in terms of plan assets, range in size from \$283 million (about 5,300 participants) to \$6 billion (and 44,000+ participants).

The most common complaints allege plan fiduciaries failed to monitor more costly investment options on the plan menu, failed to monitor their co-fiduciary investment committees, or selected target-date funds with little or no historical performance. Other common claims have included plans paying significantly higher administrative fees per participant than the market average. Year-to-date complaints filed claim an average \$165 per participant cost for recordkeeping and administrative services per year when a reasonable average cost would have been \$40. (Note that this is a raw average across complaints filed this year; actual claims in the lawsuits range from costs of \$71 to \$425 per participant.)

**Retirement Plan Research**

**2021 Retirement Confidence Survey.** Despite a global pandemic, the [31<sup>st</sup> annual RCS survey](#) by the Employee Benefit Research Institute found that 80% of retirees are confident of their ability to live comfortably throughout retirement, notwithstanding the ongoing Coronavirus pandemic. This result is similar to the 76% of retirees who responded to the survey in March 2020, when the initial lockdowns began. Moreover, 72 percent of workers are confident of their ability to retire comfortably, up 3 points over last year.

## Q1 2021 FIDUCIARY NEWS

**Retirement Plan Withdrawals.** Nearly one-fourth of plan contributions made by participants 50 or younger are withdrawn every year, mostly as a result of job loss or change, according to [a detailed report](#) released April 26, 2021, by the Joint Committee on Taxation. According to the report, that's about 19 percentage points higher than for workers not changing jobs. The report studies data of 5% of workers in the U.S. age 20 and older from 2003 to 2018, or about 140 million individual observations.

## Q1 2021 MARKET REVIEW

**The Markets (first quarter through March 31, 2021)**

As we closed out 2020, the overwhelming sentiment entering January was that it couldn't get much worse. Unfortunately, January did not start out on a high note. During the first week of the month, protesters stormed the United States Capitol, leading to violence, the disruption of the presidential election certification, and several deaths. Nevertheless, the inauguration of Joe Biden as our 46th president took place as scheduled. January also saw the emergence of virus mutations, the uneven distribution of COVID-19 vaccines, and the gradual relaxation of pandemic-related restrictions. Also during January, a new phenomenon in stock price manipulation emerged involving several companies, including a video-game company. Ultimately, stocks closed the month mixed, with the Russell 2000 and the Nasdaq gaining, while the Dow and the S&P 500 fell. Treasury yields, the dollar, and crude oil prices advanced.

Major equity indexes reached record highs in February, only to pull back by the end of the month. Fearful that inflationary pressures would mount, investors favored value stocks over growth, pushing small-cap and mid-cap stocks higher. Investors were encouraged by President Joe Biden's \$1.9 trillion stimulus proposal, accelerated vaccine distribution, and better-than-expected fourth-quarter corporate earnings. By the end of February, each of the benchmark indexes listed here posted gains led by the Russell 2000, which advanced more than 6.0%. The yield on 10-year Treasuries continued to grow, crude oil prices pushed past \$61 per barrel, and the dollar rose. Only 50,000 new jobs were added in February, although unemployment claims decreased.

Stocks continued to push higher in March. Several of the benchmark indexes posted noteworthy gains including the Dow (6.6%), the S&P 500 (4.2%), and the Global Dow (4.0%). The Russell 2000 (0.9%) and the Nasdaq (0.4%) advanced moderately. Among the sectors, industrials (8.1%), utilities (7.4%), consumer staples (6.5%), and materials (6.4%) led the way. Treasury yields and the dollar advanced, while crude oil prices and gold fell.

## Q1 2021 MARKET REVIEW

Overall, the first quarter was definitely eventful. Additional federal stimulus payments lined many pocketbooks; a group of amateur traders banded together through social media to drive shares of a video gaming company to astronomical heights; interest rates jumped, stoking fears that inflationary pressures were rapidly building; and equities ultimately enjoyed robust returns. The small caps of the Russell 2000 gained nearly 12.5%, the Global Dow climbed 9.4% and the large caps of the Dow (7.8%) and the S&P 500 (5.8%) posted solid gains. Tech shares, which had driven the market for much of 2020, slumped during the quarter, but still gained enough ground to push the Nasdaq up by almost 3.0%. Energy shares posted some of the biggest gains in the quarter, with that market sector surging over 30.6%. Financials jumped 18.0%, followed by industrials (12.0%), materials (10.8%), and real estate (10.0%). Only information technology failed to advance by the end of the quarter. The yield on 10-year Treasuries climbed more than 80 basis points. Crude oil prices increased and the dollar rose. Gold prices fell nearly 10.0% in the first quarter. Year to date, the Russell 2000 is well ahead of its 2020 year-end closing value, followed by the Global Dow, the Dow, the S&P 500, and the Nasdaq.

The price of crude oil (CL=F) closed at \$59.32 per barrel on March 31, lower than the February 26 price of \$61.50 per barrel but well above the December 31 price of \$48.52. The national average price of retail regular gasoline was \$2.852 per gallon on March 29, up from the February 22 price of \$2.633 and 27.0% higher than the December 28 selling price of \$2.243. The price of gold finished March at \$1,708.40 per ounce, lower than the February 26 price of \$1,728.10 per ounce and significantly below its December 31 closing value of \$1,893.10 per ounce.

## Q4 2021 FIDUCIARY NEWS

## Legislative Update from Capitol Hill

**Retirement Plan Legislation on Hold.** Final action on legislation in Congress that would provide additional financial incentives for workers saving for retirement is likely to be pushed back to late spring. Congress remains largely in gridlock as the Senate wrestles with compromise on a \$1.8 trillion tax-and-spend proposal by the Biden Administration, known as the Build Back Better legislation. The bipartisan retirement legislation in the House that has been delayed as a result, H.R. 2954, "Securing a Strong Retirement Act of 2021," or SECURE 2.0. It is anticipated that the final vote will include consideration of several amendments passed by the House Committee on Education & Labor, which has jurisdiction over the Department of Labor. The SECURE Act 2.0's counterpart on the Senate side, S. 1770, the Retirement Security and Savings Act (RESA), along with related bills pending action in the Senate Finance and Health, Education and Labor committees, are expected to be voted out of these committee in late spring.

Both the House and Senate legislation includes 27 overlapping provisions designed to encourage plan adoption by small businesses, promote retirement savings, and add penalty-free fixes to minor plan administrative errors.

Despite the impasse on Capitol Hill, Fi360 expects the House and Senate bills could be signed into law sometime in fall 2022.

## Department of Labor

**New ESG Rule Coming.** The Biden Administration has proposed a new rule that would make it easier for 401(k)-type plans to offer environmental, social and governance (ESG) investments in plans while reducing potential fiduciary liability. The proposed rule was released for public comment last fall; the comment period close Dec. 13, 2021. Final action by the DOL is expected later this year. The new ESG rule, which includes provisions governing proxy voting by plan fiduciaries, will replace the Trump-era rule that discouraged ESG investing.

The proposed new ESG rule follows up on the Biden Administration's announcement in March 2021 that it would not pursue enforcement action for violations of the Trump-era ESG rule.

**Private Equity in the Menu Lineup.** The DOL on Dec. 21, 2021, released [guidance cautioning plan sponsors](#) on the use of a private equity component in a professionally managed asset allocation fund, particularly in small plans where may have little or no experience with these investment options. The guidance supplements a June 2020 Information Letter that permits the limited use of private equity – not as a standalone investment, but as a component of an asset allocation fund – as long as it met ERISA's prudence standard.

The latest guidance clarified that the June 2020 letter was in response to large plan sponsors that offer both defined benefit and participant-directed retirement plans. The new guidance cautioned plan sponsors, particularly small plans, to be alert to marketing efforts that may misrepresent the June 2020 letter as endorsing or recommending the use of private equity in 401(k) plans.

**Lifetime Income Disclosures.** The DOL in July 2021 [released a two-page FAQ](#), clarifying when plan administrators need to comply with the interim rule adopted in 2020 requiring delivery of 'lifetime income illustrations,' to plan participants and beneficiaries. The interim rule requires plan sponsors to, in effect, provide their workers with annuity 'snapshots' of what a plan participant's current account balance would look like as a monthly

---

## Q4 2021 FIDUCIARY NEWS

---

stream of income in retirement. According to the DOL's FAQs, plan sponsors must provide the quarterly disclosures beginning with the 2<sup>nd</sup> quarter of 2022.

The lifetime income rule was mandated in SECURE Act 1.0, signed into law in late 2019, and applies to participants in 401(k) and 403(b)-type plans. The DOL on Aug. 18, 2020, had [issued an interim final rule](#) providing details on how the disclosure should be calculated. In general, the illustration would provide participants with a single and qualified joint and 100% survivor fixed-income annuity illustration (without any projection for future earnings, contributions or investment returns) based on their current account balance. The assumptions also would assume that the participant retires at age 67 and payments start immediately.

The DOL still plans on issuing a final rule on lifetime income disclosures, based on feedback on the interim rule, which could lead for further changes. The agency acknowledges that additional transition time would be needed if any new changes are approved.

**Form 5500 Filing Changes.** Numerous changes [have been made](#) to the annual Form 5500 required filing by plan sponsors covering the plan's financial condition, investments and operation. Several of the changes were required by the SECURE Act, which was signed into law in 2019. Among the changes likely to be welcomed by plan sponsors is the method of counting plan participants by including only those with account balances, and not those eligible to participate in the plan. Another streamlined improvement applicable to MEPs is allowing employers without a common nexus to join a MEP and file a single Form 5500.

**Compliance Calendar for DC Plans.** Plan sponsors may want to [post in their HR department bulletin boards a helpful compliance calendar](#) for single-employer DC plans, courtesy of Mercer Law & Policy Group. The calendar covers requirements for plan years beginning Jan. 1, 2022.

## ERISA Litigation Update

**ERISA Class-Actions Filed at Slower Pace in 2021.** Forty-six excessive fee lawsuits were filed against 401(k) and 403(b) plan sponsors at the end of 2021, or nearly one per week. However, the pace of filings has slackened compared to the record set in 2020 of 97 class-actions, or more than twice as many. Plans targeted in 2021, in terms of plan assets, ranged in size from \$176 million (4,000 participants) to \$15 billion (unknown number of participants). Data tracked by Fi360 does not include stock-drop or ESOP suits.

The most common complaints allege plan fiduciaries failed to monitor other fiduciaries – typically their investment committees – who in turn failed to monitor recordkeeping costs and to timely remove underperforming investment options on the plan menu. Other allegations included failure to put recordkeeping services out for bid and selecting expensive share classes when lower-cost options were available. Still other complaints included the use of new and untested target-date funds in the lineup, paying significantly higher administrative/recordkeeping fees per participant than the market average, and failure to disclose certain fees involving revenue-sharing, 'hidden expense ratios,' and other administrative expenses.

---

**Q4 2021 FIDUCIARY NEWS**

---

Fi360 analysis indicates target-date and proprietary funds are the investments most commonly disputed in class-action filings, and that the size of plans targeted has moved downstream in recent years, from four medium-sized plans in 2016 (\$100m-\$1b) to 21 in 2021. Mega plans (\$1B-plus in assets) defending class-actions have dropped slightly from 31 sued in 2016 to 29 last year.

**Supreme Court Review Underway of ERISA Excessive-Fee Case.** Plan sponsors and plaintiffs are anxiously awaiting a decision by the Supreme Court involving one of two-dozen university 403(b) retirement plans that were sued in 2016. Both 401(k) and nonprofit 403(b) plans are subject to the same prudence requirements under ERISA. Most of the university lawsuits have been settled with a few dismissed. However, in July the Supreme Court granted certiorari for review of *Hughes v. Northwestern University*, with oral arguments held Dec. 6, 2021.

Although the original and amended complaints included numerous allegations centered on excessive recordkeeping costs including too many recordkeepers and payment via revenue sharing versus per head charges, and offering mutual funds with excessive fees, the Seventh Circuit upheld a lower court's order in *Northwestern* dismissing all claims.

A Supreme Court decision favoring plan fiduciaries could result in tougher pleading standards, and making it easier to dismiss so-called 'copycat' lawsuits prior to discovery and other pretrial motions that quickly run up legal bills. At least eight similar class-actions were put on hold by district courts pending the Supreme Court's decision, which is expected before the current session of the court ends in June 2022.

### Retirement Research/Surveys

**Leakage from 401(k) Plans and IRAs More Extensive Than Previously Believed.** Research by the U.S. Treasury Department and Congress's Joint Committee on Taxation [suggests 'leakage' from retirement accounts](#) may be larger than earlier estimates.

According to the paper, leakage comes from three sources: cash-outs when participants change jobs, hardship withdrawals, and failure to repay account loans. Older data from Vanguard and household surveys indicated a roughly annual leakage rate of 1.2%-1.5%, but the source of the latest, restricted tax data – doubles the amount of leakage at 2.9% of assets each year. This translates into a 31% reduction in retirement assets by age 60 in the most recent study.

**TDF Study Suggests Equity Allocations Too Low for Retirees.** According to [a working paper](#) recently published by the National Bureau of Economic Research, the glidepath allocation is not optimal for most retirees and also including pre-retirees beginning around 15 years prior to retirement. The study's authors conclude that "optimal" equity allocations require further customization, based in particular on wealth levels, state of the business cycle, and the dividend-price ratio of the aggregate stock market.

**3Q Retirement Assets Held Steady - ICI Data Release.** [Data from the Investment Company Institute](#) for the 3<sup>rd</sup> quarter of 2021 indicated U.S. retirement assets were down only slightly, or 0.5%, compared to the 2<sup>nd</sup>. Workers held \$10.4 trillion in employer-based defined contribution plans at the end of September, of which \$7.3 trillion were in 401(k) plans. Assets in IRAs totaled \$13.2 trillion at the end of the 3<sup>rd</sup> quarter.

## Q4 2021 MARKET REVIEW

### Annual Market Review 2021

#### Overview

The year 2021 was one of extreme change. January saw the inauguration of President Joe Biden, but not before protesters sieged the United States Capitol. Despite the initial tumult, the year began with hope that increased availability of coronavirus vaccinations would lead to the end of the pandemic. Unfortunately, throughout the year, the emergence of virus mutations, coupled with the uneven distribution of vaccines, saw millions more people become ill or perish after contracting the virus.

Nevertheless, several of the worlds' largest economies enjoyed notable recoveries. In the United States, two additional rounds of stimulus payments in the first quarter helped line consumers' pocketbooks, which led to rapidly increasing demand for goods and services. Historically low lending rates and a rise in remote work increased the opportunity for consumers to spend.

However, the rapid economic turnaround brought with it a historic surge in consumer and producer prices, labor shortages, and global supply-chain bottlenecks. Low interest rates and stimulus measures adopted by the Federal Reserve gave people more access to money and buying power. Personal income increased as did personal consumption expenditures. Corporate earnings were strong, despite labor and supply shortages and lingering economic uncertainty caused by the pandemic.

U.S. inflation reached a nearly 40-year high late in the year, as growing consumer demand was stunted by pandemic-related supply constraints. Historically low mortgage rates helped propel the housing market, as both the number of residential sales and property values escalated. Energy prices, particularly gas prices, rose by nearly 50%, as crude oil reached more than \$80 per barrel for the first time since 2014.

An influx of day-trading investors collided with hedge-fund investors and Wall Street professionals. So-called "meme traders" manipulated stock prices from their sofas through collaborative investing on social media platforms.

Cryptocurrency also gained more mainstream acceptance and attention in 2021, with a market cap of all cryptocurrencies topping \$3 trillion. The rapid growth of cryptocurrency also led to more government scrutiny. China's central bank declared all cryptocurrency-related transactions illegal as that country was determined to crack down on the industry.

U.S. economic recovery was highlighted by job growth and dwindling unemployment claims. Employment gains averaged over 550,000 per month in 2021, while weekly jobless claims fell to a 52-year low in December.

Despite increasing numbers of COVID-related cases, the stock market generally prospered, with each of the benchmark indexes posting year-over-year gains. Each of the market sectors also ended 2021 in the black. Overall, we experienced plenty of change in 2021. The year 2022 is likely to be very interesting as well.

## Q4 2021 MARKET REVIEW

### Stock Market Indexes

Market/Index	2020 Close	As of 9/30	2021 Close	Month Change	Q4 Change	2021 Change

Chart reflects price changes, not total return. Because it does not include dividends or splits, it should not be used to benchmark performance of specific investments.

### Snapshot 2021

#### The Markets

**Equities:** Throughout the year, the U.S. stock market pushed higher. Despite mounting COVID cases, escalating inflation, labor shortages, supply bottlenecks, and severe weather that hit nearly every part of the country at one time or another, Wall Street continued to post gains. Large caps, small caps, growth, value — seemingly every market segment increased, surpassing most of the outlooks at the start of the year. While many factors contributed to the strong market performance in 2021, a few highlights include consistently favorable data pointing to ongoing economic recovery, strong corporate earnings throughout 2021, the acceptance of cryptocurrency as a mainstream investment, a low interest-rate environment, stimulus programs that provided consumers with cash, increasing job opportunities, and the availability of coronavirus vaccines.

On the last day of the year, the S&P 500 eclipsed its 2020 closing by nearly 27.0%, the Nasdaq rose by more than 21.3%, the Dow gained about 19.0%, the Global Dow advanced 18.6%, and the Russell 2000 climbed 13.7%. The fourth quarter was particularly robust for large caps, with the S&P 500 climbing 10.7% and the Dow advancing 7.4%. Each of the market sectors closed the year well above its prior year's totals. Energy ended 2021 48.0% higher, followed by real estate (43.0%), information technology (33.5%), and financials (33.0%).

**Bonds:** For the most part, long-term bonds underperformed, particularly on inflation concerns, low interest rates, economic growth, and favorable stock performance. Ten-year Treasuries ended the year at 1.51%, up 60 basis points, the biggest annual rise since 2013. U.S. bond returns were down about 3.0%, well below other major bond markets. With the Federal Reserve likely to accelerate interest rates in 2022, 10-year Treasury yields are expected to push above 2.0% next year.

**Oil:** Crude oil prices fell in 2020 as demand dwindled due to coronavirus constraints. However, crude oil prices surged in 2021 as economic growth quickly increased demand and the time needed to accelerate output to pre-pandemic levels. Crude oil prices opened the year around \$48.50 per

## Q4 2021 MARKET REVIEW

barrel but rose steadily for most of the year, reaching more than \$80.00 per barrel in October — a price not seen since 2014 — ultimately ending 2021 at about \$75.44 per barrel.

Prices at the pump also vaulted higher in 2021. The national average retail price for regular gasoline was \$2.249 per gallon to begin 2021. Gas prices steadily increased throughout the year, reaching a high of \$3.410 in early November. Gas prices trended marginally lower for the remainder of 2021, closing out the year at \$3.275 per gallon on December 27.

**FOMC/interest rates:**The Federal Reserve began the year focused on promoting economic recovery. The Fed maintained the target range for the federal funds rate at 0.00%-0.25% for the duration of 2021, while continuing to purchase securities on a monthly basis (\$80 billion Treasuries and \$40 billion mortgage-backed securities) through November. For much of the year, employment gains were solid, consumer demand for goods and services increased, and overall economic activity strengthened. However, strong consumer demand collided with pandemic-related supply constraints, driving prices higher, such that inflation hit a nearly 39-year high in November, with prices up 6.8% (Consumer Price Index) from a year before. The Fed initially termed the rapid rise in prices "transitory," expecting that the factors driving inflation upward would subside. However, by November, the Fed acknowledged that factors contributing to inflationary pressures were more than "transitory" and agreed to begin tapering its asset purchases in December. The Fed also projected that it would increase interest rates as many as three times in 2022.

**US Dollar-DXY:**The dollar held its own for much of the year, reaching a new high in November. Despite a marginal dip at the end of the year, the dollar is still on track to enjoy its biggest gain since 2015. With the prospects of the Federal Reserve raising interest rates, the dollar could see another surge in 2022. The US Dollar Index (DX-Y.NYB), which measures the U.S. dollar against the currencies of several other countries, hit a high of \$96.94 in November and hovered between \$92.60 and \$96.00 since early July. It closed at \$95.64 on December 31, rising nearly 6.5% since the beginning of the year.

**Gold:** Gold prices began the year at \$1,893.10 and closed 2021 at \$1,830.30, a decrease of nearly 3.3%. During the year, gold fell to \$1,700.20 at the end of February, only to surge to \$1,895.70 in mid-May. Generally, stock market growth, rising bond yields, and a stronger dollar kept gold prices in check for most of 2021.

## STATEMENT OF ADDITIONAL DISCLOSURES

### INTRODUCTION

This report is for informational purposes only and does not constitute professional investment advice. Some data in this report was obtained from third parties. Although Fi360 obtains data from sources it deems to be reliable, it does not independently verify the data, and does not warrant or represent that the data is timely, complete, or accurate.

Unless denoted otherwise with a CI superscript (Investment Name <sup>CI</sup>), the investment data source is © 2022 Morningstar, Inc. All rights reserved. The data contained herein: (1) is proprietary to Morningstar, Inc. and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar, Inc. nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. Any investment denoted with the CI subscript was supplied by another 3rd party such as the advisor, custodian, recordkeeper or other provider.

**Mutual funds and Exchange Traded Funds (ETFs) are sold by prospectus. Please consider the investment objectives, risks, charges and expenses carefully before investing. The prospectus and, if available, the summary prospectus, which contains this and other information, can be obtained by calling your financial advisor. Read the prospectus and, if available, the summary prospectus carefully before you invest.**

**All investments involve risk. The principal value and investment return will fluctuate so that your shares, when redeemed, may be worth more or less than the original cost. All investing involves risk, including the possible loss of principal. This does not apply, however, to the guaranteed portions of group annuity contracts that constitute guaranteed benefit policies as defined in ERISA 401(b)(2)(B).**

Collective investment trusts (CITs) are available for investment primarily by eligible retirement plans and entities. Participation in CITs is generally governed by the terms of a Declaration of Trust and a Participation or Adoption Agreement, which is signed by the retirement plan's fiduciary at the time the plan invests in the CITs. In addition, various other documents may contain important information about the CITs including Fund Descriptions, Statement of Characteristics or Investment Guidelines, and/or other fee or investment disclosure documents. All of these documents may contain important information about CIT fees, investment objectives, and risks and expenses of the underlying investments in the CITs and should be read carefully before investing. To obtain a copy, you will need to contact the plan sponsor or trustee of the CIT.

**CITs are not insured by FDIC or any other type of deposit insurance; are not deposits or other obligations of, and are not guaranteed by any firm or their affiliates; and involve investment risks, including possible loss of principal invested. CITs are not mutual funds and are exempt from registration and regulation under the Investment Company Act of 1940 (the "1940 Act"), and their units are not registered under the Securities Act of 1933, or applicable securities laws of any state or other jurisdiction. Unit holders of the Funds are not entitled to the protections of the 1940 Act. The decision to invest in CITs should be carefully considered. The CITs unit values will fluctuate and may be worth more or less when redeemed, so unit holders may lose money. CITs are not sold by prospectus and are not available for investment by the public; Fund prices are not quoted in readily available market quotation services.**

Fi360 is under common ownership with Matrix Trust Company, who is the discretionary trustee of certain CITs that may be noted in this report.

Separate Accounts are available through a group annuity contract. The contract and other fee/disclosure documents, such as fact sheets, may contain important information about the separate account fees, investment objectives and risks and expenses of underlying investments in the separate accounts and should be read carefully before investing. Certain investment options may not be available in all states or U.S. commonwealths. Some payments or transfers from the Separate Accounts may be deferred as described in the group annuity contracts providing access to the Separate Accounts or as required by applicable law. Such deferment will be based on factors that may include situations such as: unstable or disorderly financial markets or investment conditions which do not allow for orderly investment transactions.

This Statement of Additional Disclosures includes important information regarding the information provided in the report. If an investor does not understand any term or data presented herein, he/she should consult with his/her financial advisor.

### FI360 FIDUCIARY SCORE®

**Fi360 Fiduciary Score®.** The Score is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Rolling Averages are a one-, three-, five- or ten-year equal-weighted average of an investment's Fi360 Fiduciary Scores during that corresponding time period. The Historical Fi360 Fiduciary Scores at Quarter End trend chart (if included) displays the Fi360 Fiduciary Score for each calendar quarter-end during that year.

## STATEMENT OF ADDITIONAL DISCLOSURES

Short Fall Points - If an investment does not meet an individual due diligence criterion, short fall points are tallied. Investments that satisfy all of the due diligence criteria receive an Fi360 Fiduciary Score of 0. Every other investment is given a Score of 1-100 based on their short fall point total, and representing their percentile ranking within their peer group. The Fi360 Fiduciary Score represents a suggested course of action and is not intended, nor should it be used, as the sole source of information for reaching an investment decision. Visit [www.fi360.com/fi360-Fiduciary-Score](http://www.fi360.com/fi360-Fiduciary-Score) for the complete methodology document.

**Criteria.** The following criteria are included as part of the Score calculation.

1. **Inception Date.** The investment must have at least a 3 year track history
2. **Manager Tenure.** The investment manager must have at least a 2 year track history. (Most senior manager's tenure)
3. **Net Assets.** The investment must have at least 75 million under management (Total across all share classes for funds/ETFs)
4. **Composition.** The investments allocation to its primary asset class should be greater than or equal to 80%. (Not applied to all peer groups)
5. **Style Drift.** The investment's current style box must match the peer group. (Not applied to all peer groups. Further details on each style can be found in the Investment Strategy & Style section below.)
6. **Prospectus Net Exp Ratio.** The investment must place in the top 75% of its peer group
7. **Alpha (3yr) - Primary Benchmark.** The investment must place in the top 50% of its peer group
8. **Sharpe (3yr).** The investment must place in the top 50% of its peer group
9. **Return (1yr).** The investment must place in the top 50% of its peer group
10. **Return (3yr).** The investment must place in the top 50% of its peer group
11. **Return (5yr).** The investment must place in the top 50% of its peer group

**Weighted Fi360 Fiduciary Score.** The Weighted Score is calculated by taking the Fi360 Fiduciary Score for each holding and weighting it by its respective allocation or \$ amount (if available). If no allocation is available for any holding, each holding is treated equally. This is then summed to represent the Average Score across the holdings. If a holding does not have a Score, it is excluded from the calculation.

## PERFORMANCE

**Total Return (No Load).** Expressed in percentage terms, an investment's total return is determined each month by taking the change in monthly net asset value, reinvesting all income and capital gains distributions during that month, and dividing by the starting NAV. Reinvestments are made using the actual reinvestment NAV, and daily payoffs are reinvested monthly. Total Return (No Load) is not adjusted for sales charges (such as front-end loads, deferred loads and redemption fees), but do reflect management, administrative, 12b-1 fees and other costs taken out of fund assets. Total returns for periods longer than one year are expressed in terms of compounded average annual returns (also known as geometric total returns).

**Total Return (With Load).** Expressed in percentage terms, an investment's total return is determined each month by taking the change in monthly net asset value, reinvesting all income and capital gains distributions during that month, and dividing by the starting NAV. Reinvestments are made using the actual reinvestment NAV, and daily payoffs are reinvested monthly. Total Return (With Load) is adjusted for front-end loads, deferred loads and redemption fees, but not taxes. For funds with front-end loads, the full amount of the load is deducted. For deferred loads and redemption fees, the percentage charged often declines the longer the shares are held. Total returns for periods longer than one year are expressed in terms of compounded average annual returns (also known as geometric total returns).

**Percentile Rank.** The relative ranking of an investment within its peer group on a scale of 1-100 (1 being the best) for the data point and time period being measured. Rankings are calculated against the corresponding Peer Group and Number of Peers as explained in the following paragraph. Performance ranks do not account for an investment's sales charge (if applicable). Ranks will not be provided for periods less than one year.

**Number of Peers.** The number of investments in the same peer group which were used to calculate any percentile rank or Fi360 Fiduciary Score. Only investments which had the given data point being ranked are included in this number, so the number of peers can change for the same investment by data point being ranked. For Mutual funds (MF) and Exchange Traded Funds (ETF), we combine both sets of investments together to form one peer group for ranking purposes. For Collective Investment Trusts (CIT), since many do not report timely, we utilize the pre-defined MF/ETF peer group and calculate the ranks as an overlay on that peer group. There is no existing MF/ETF peer group for Stable Value, Leveraged Net Long and Money Market Non-40 Act. We use the following MF/ETF peer group as a proxy instead (Stable Value uses Short-Term Bond,

## STATEMENT OF ADDITIONAL DISCLOSURES

Leveraged Net Long uses Large Blend and Money Market Non-40 Act uses Money Market Taxable) so we can calculate the ranks. For Group Retirement Plan Annuities (GRPA), we combine this universe with all mutual funds and ETFs to form one peer group for ranking purposes. For Separately managed accounts (SMA) and Variable annuity sub accounts (VA), we use their respective universe of investments only.

**Growth of 10k Chart.** This chart shows an investment's performance based on how \$10,000 invested in the fund would have grown over time with dividends reinvested. The returns used in the graph are not load-adjusted. The growth of \$10,000 begins at the investment's inception, or the first year listed on the graph, whichever is appropriate. Located alongside the investment's graph line are lines that represent the growth of \$10,000 in the investment's Broad Index, Peer Group Index, and Best-fit Index Benchmarks, which are listed in the Benchmarks section. All lines are plotted on a logarithmic scale, so that identical percentage changes in the value of an investment have the same vertical distance on the graph. This provides a more accurate representation of performance than would a simple arithmetic graph.

**Upside/Downside Capture Ratio.** This ratio shows whether a given fund has outperformed—gained more or lost less than—a broad market benchmark during periods of market strength and weakness, and if so, by how much. Upside capture ratios for funds are calculated by taking the fund's monthly return during months when the benchmark had a positive return and dividing it by the benchmark return during that same month. Downside capture ratios are calculated by taking the fund's monthly return during the periods of negative benchmark performance and dividing it by the benchmark return. Upside and downside capture ratios over three- and five-year periods are determined by calculating the geometric average for both the fund and index returns during the up and down months, respectively, over each time period. An upside capture ratio over 100 indicates a fund has generally outperformed the benchmark during periods of positive returns for the benchmark. Meanwhile, a downside capture ratio of less than 100 indicates that a fund has lost less than its benchmark in periods when the benchmark has been in the red. All stock funds' upside and downside capture ratios are calculated versus the S&P 500, whereas bond and international funds' ratios are calculated relative to the Barclays Capital U.S. Aggregate Bond Index and MSCI EAFE Index, respectively.

**Risk/Reward Chart.** This chart helps to visually review the relative reward (measured by investment return) received by a fund for the risk or volatility (measured by standard deviation) of the fund over a three or five-year period. Relatively speaking, it is preferable for the diamond to fall in the upper left quadrant of the graph.

**Benchmarks.** A benchmark gives an investor a point of reference for evaluating a fund's performance by comparing benchmark returns to the fund's returns. This report may utilize one or many of these benchmarks:

**Broad Index.** The index used in the calculation of metrics such as Alpha, Beta, and R-Squared. The Broad Index provides a common comparison point for funds with similar investing styles across different peer groups.

**Peer Group Index.** The index assigned to the fund's peer group, which is a group of funds with similar investment style. Each peer group has its own index which can be used as a common comparison point between funds.

**Best-fit Index.** The market index that shows the highest correlation with a fund over the most-recent 36 months, as measured by the highest R-Squared. In addition, the Best-fit Index can be used to compare the betas and alphas of similar funds that show the same Best-fit Index. The Best-fit Index may not be the fund's benchmark, nor does it necessarily contain the types of securities that may be held by the fund.

Indices are unmanaged and cannot be invested in directly. Please reference the Index Descriptions section for more specific detail on each index that is included in this report.

## VOLATILITY METRICS

**Standard Deviation.** A statistical measure of the historical volatility. It depicts how widely the returns varied over a certain period of time. Investors use standard deviation to try to predict the range of returns that are most likely for a given time period. When an investment has a high standard deviation, the predicted range of performance is wide, implying greater volatility. If the investment is the only holding in an investor's portfolio, then it is an appropriate measure of risk. If the returns follow a normal distribution, then approximately 68 percent of the time they will fall within one standard deviation of the mean return for the investment and 95 percent of the time within two standard deviations.

**Sharpe Ratio.** A risk-adjusted measure developed by Nobel Laureate William Sharpe. The higher the Sharpe ratio, the better the investment's historical risk-adjusted performance. The Sharpe ratio is calculated for the past three or five-year period by dividing the investment's annualized excess return by the standard deviation of an investment's annualized excess return. Since this ratio uses standard deviation as its risk measure, it is

## STATEMENT OF ADDITIONAL DISCLOSURES

most appropriately applied when analyzing an investment that is an investor's sole holding. The Sharpe ratio can be used to compare two funds directly on how much risk an investment had to bear to earn excess return over the risk-free rate.

## MPT STATISTICS

**Modern Portfolio Theory (MPT).** A method for selecting investments with the goal of maximizing overall returns given an acceptable level of risk by using diversification. MPT statistics are calculated from a comparison of a fund(s) excess returns and the benchmark(s) excess returns.

**Alpha.** A measure of the difference between an investment's actual returns and its expected performance, given its level of risk as measured by beta. Alpha is often seen as a measure of the value added or subtracted by a manager. A positive alpha figure indicates the investment has performed better than its beta (or expected return) would predict. In contrast, a negative alpha indicates the investment underperformed, given the expectations established by the investment's beta.

**Beta.** A measure of an investment's sensitivity to market movements. The beta of the market is 1.00 by definition. An investment with a beta greater than 1.00 is more volatile than the market, and an investment with a beta less than 1.00 is less volatile than the market.

**R-Squared.** This statistic reflects the percentage of an investment's movements that can be explained by movements in its benchmark index, showing the degree of correlation between the investment and the benchmark. An R-squared of 100 indicates that all movements of an investment can be explained by movements in the index. Thus, index funds that invest only in S&P 500 stocks will have an R-squared very close to 100. Conversely, a low R-squared indicates that very few of the investment's movements can be explained by movements in its benchmark index. An R-squared measure of 35, for example, means that only 35% of the investment's movements can be explained by movements in the benchmark index. R-squared can be used to ascertain the significance of a particular beta. Generally, a higher R-squared will indicate a more reliable beta figure. If the R-squared is lower, then the beta is less relevant to the investment's performance.

## EXPENSES

**Prospectus Net Expense Ratio.** This value is from the investment's most recent prospectus. The percentage of investment assets used to pay for operating expenses and management fees, including 12b-1 fees, administrative fees, and all other asset-based costs incurred by the fund, except brokerage costs. Fund expenses are reflected in the fund's Net Asset Value. Sales charges are not included in the expense ratio. The expense ratio for fund of funds is the aggregate expense ratio defined as the sum of the wrap or sponsor fees plus the estimated weighted average of the underlying fund fees. A higher expense ratio will "drag" on the overall performance of a fund compared to peers with a lower expense ratio.

**Net Expense Ratio (Rank).** The percentile rank for the Net Expense Ratio within the investment's peer group. 1 being the best and 100 the worst.

**Prospectus Gross Expense Ratio.** This value is from the investment's most recent prospectus. The total gross expenses (net expenses with waiver added back in) divided by the fund's average net assets. If it is not equal to the net expense ratio, the gross expense ratio portrays the fund's expenses had the manager not waived a portion, or all, of its fees. Thus, to some degree, it is an indication of fee contracts. Some fee waivers have an expiration date; other waivers are in place indefinitely.

**Audited Net Expense Ratio.** The percentage of fund assets paid for operating expenses and management fees, including 12b-1 fees, administrative fees, and all other asset-based costs incurred by the fund, except brokerage costs. Fund expenses are reflected in the fund's NAV. This expense ratio is pulled directly from the investment's annual report. Sales charges are not included in the expense ratio. For fund of funds, the underlying fund expense ratios are not included in the expense ratio.

**Management Fee.** Fee charged for the management of pooled investments such as collective investment funds, insurance/annuity products, mutual funds and individually managed accounts.

**12b-1 Fee.** This value is usually taken from the fund's prospectus but may have been edited by your financial advisor if the prospectus amount was not accurate for your given situation. This value is part of the Net Expense Ratio. It represents a maximum annual charge deducted from investment assets to pay for distribution and marketing costs. This value can be rebated back to the client to offset other expenses.

**Front Load.** A one-time deduction from a purchase made into the fund. The amount is relative to the amount of the investment, so that larger investments incur smaller rates of charge. The sales charge serves as a commission for the broker who sold the fund. Potential fees and sales

## STATEMENT OF ADDITIONAL DISCLOSURES

charges are an important factor to consider before making an investment. The load compensates the broker or financial planner for the service of providing professional investment advice.

**Deferred Load.** A one-time charge paid at the time of the sale of the fund. The amount is relative to the amount of the investment, so that larger investments incur smaller rates of charge. The sales charge serves as a commission for the broker who sold the fund. Potential fees and sales charges are an important factor to consider before making an investment. The load compensates the broker or financial planner for the service of providing professional investment advice.

**Redemption fee.** Amount charged when money is withdrawn from the fund. This fee does not go back to the investment company, but rather into the fund itself and thus does not represent a net cost to shareholders. Also, unlike contingent deferred sales charges, redemption fees typically operate only in short, specific time clauses, commonly 30, 180, or 365 days. However, some redemption fees exist for up to five years. Charges are not imposed after the stated time has passed. These fees are typically imposed to discourage market timers, whose quick movements into and out of an investment can be disruptive. The charge is normally imposed on the ending share value, appreciated or depreciated from the original value.

**Initial Minimum Investment.** The smallest investment amount accepted for establishing a new investment in the fund. Funds often charge a lower fee for larger initial investments and will have several share classes that provide an alternative initial investment.

**Fee Waiver/Cap.** This value is from the investment's most recent prospectus. The elimination of all or part of a fund's expense or the cap or maximum fee charged by the portfolio manager. Some fee waivers and caps have an expiration date; others are in place indefinitely. Some funds adopt this practice at various times to make their returns more competitive.

**Basis Point (BPS).** One-hundredth of a percentage point. For example, 50 basis points equals .50%.

**Investment Option Costs (\$ Costs).** Fi360 calculates this value by taking the Net Expense Ratio and adding any applicable Wrap fee. It represents the total costs paid through the investment options. Note that other costs may be paid directly to other service providers as outlined in this report.

**Mgmt. Fee (Effective Management Fee).** Fi360 calculates this value by taking the Net Expense Ratio and subtracting any 12b-1, SubTA and Shareholder Service (Shr Svc) fees as those are not retained by the investment manager. It represents the fee charged for the management of pooled investments such as collective investment funds, insurance/annuity products, mutual funds and individually managed accounts.

**Revenue Sharing.** Fi360 calculates this value by summing the 12b-1, Sub-TA, Shareholder Service and Wrap Fee for each investment. It represents the total costs paid through the investment options but directed to another service provider (not for the direct management of the investment option). This value can be rebated back to the client to offset other expenses.

**Shareholder Service Fee (Shr Svc).** This value is entered by your financial advisor and is part of the Net Expense Ratio. Typically, this value is passed back to a custodian or recordkeeper that is providing custodial services for the client/plan assets. This value can be rebated back to the client to offset other expenses.

**Sub-TA.** This value is entered by your financial advisor and is part of the Net Expense Ratio. Also known as Sub-Transfer Agency Fees, the name of this fee refers to the subcontracting of participant accounting to third parties, called Sub Transfer Agents. The transfer agent is the bank or trust company that executes, clears and settles buy or sell orders for mutual fund shares, and maintains shareholder records of ownership. When these functions are subcontracted to another recordkeeper, the fee paid to the sub-contractor is called the Sub-TA fee. Typically, Sub-TA fees are not disclosed in the prospectus and can vary depending on the client's circumstances. This value can be rebated back to the client to offset other expenses.

**Weighted Average Expense Ratio.** Fi360 calculates this value by taking the Total Investment Option Costs and dividing by the Total Client Assets. It represents the average expenses paid through the investment options.

## INVESTMENT STRATEGY & STYLE

**Peer Group.** Fi360 utilizes the Morningstar Category for peer group assignment. In an effort to distinguish funds by what they own, as well as by their prospectus objectives and styles, Morningstar developed the Morningstar Categories. While the prospectus objective identifies a fund's investment goals based on the wording in the fund prospectus, the Morningstar Category identifies funds based on their actual investment styles as measured by their underlying portfolio holdings (portfolio and other statistics over the past three years). Peer groups are for comparison only, and do

## STATEMENT OF ADDITIONAL DISCLOSURES

not represent any investable products. Please reference the Peer Group Descriptions section for more specific detail on each peer group that is included in this report.

**Investment Strategy.** A written summary of the Investment Objectives and Policy section found in every fund prospectus. It states the objective of the fund, and how the managers intend to invest to achieve this objective. It includes any limitations as to the fund's investment policies, as well as any share class structure difference, previous names, merger, liquidation, and opening or closing information. This statement is from the fund prospectus.

**Morningstar Equity Style Box™.** Morningstar classifies funds as being large-cap, mid-cap, or small-cap based on the market capitalization of long stocks owned; and as value, blend, or growth based on the value-growth orientation of the stock holdings. The nine possible combinations of these characteristics correspond to the nine squares of the Morningstar Style Box-size is displayed along the vertical axis and style is displayed along the horizontal axis. The referenced data elements below are a weighted average of the long equity holdings in the portfolio.

Price/Earnings Ratio is a weighted average of the price/earnings ratios of the stocks in the underlying fund's portfolio. The P/E ratio of a stock is calculated by dividing the current price of the stock by its trailing 12-months' earnings per share. In computing the average, portfolio holding is weighted by the percentage of equity assets it represents.

Price/Cash Flow Ratio is a weighted average of the price/cash-flow ratios of the stocks in a fund's portfolio. Price/cash-flow shows the ability of a business to generate cash and acts as a gauge of liquidity and solvency.

Price/Book Ratio is a weighted average of the price/book ratios of all the stocks in the underlying fund's portfolio. The P/B ratio of a company is calculated by dividing the market price of its stock by the company's per-share book value. Stocks with negative book values are excluded from this calculation.

Geometric Average Market Capitalization of a fund's equity portfolio offers a measure of the size of the companies in which the mutual fund invests.

**Morningstar Fixed Income Style Box™.** Morningstar classifies bond funds in its style box based on their interest rate sensitivity as limited (Ltd), moderate (Mod) and extensive (Ext) measured by the average effective duration of the fund's holdings; and their credit quality (Qual) as high (High), medium (Med), or low (Low) based on letter (or alphanumeric) credit ratings of the long bonds owned by third party credit rating agencies. The nine possible combinations of these characteristics correspond to the nine squares of the Morningstar Style Box -- quality is displayed along the vertical axis and sensitivity to interest rate along the horizontal axis.

Morningstar seeks credit rating information from fund companies on a periodic basis (e.g., quarterly). In compiling credit rating information Morningstar accepts credit ratings reported by fund companies that have been issued by all Nationally Recognized Statistical Rating Organizations (NRSROs). For a list of all NRSROs, please visit <http://www.sec.gov/divisions/marketreg/ratingagency.htm>. Additionally, Morningstar accepts foreign credit ratings from widely recognized or registered rating agencies. If two rating organizations/agencies have rated a security, fund companies are to report the lower rating; if three or more organizations/agencies have rated a security, fund companies are to report the median rating, and in cases where there are more than two organization/agency ratings and a median rating does not exist, fund companies are to use the lower of the two middle ratings. PLEASE NOTE: Morningstar, Inc. is not itself an NRSRO nor does it issue a credit rating on the fund. An NRSRO or rating agency ratings can change from time-to-time.

For credit quality, Morningstar combines the credit rating information provided by the fund companies with an average default rate calculation to come up with a weighted-average credit quality. The weighted-average credit quality is currently a letter that roughly corresponds to the scale used by a leading NRSRO. Bond funds are assigned a style box placement of "low", "medium", or "high" based on their average credit quality. Funds with a low credit quality are those whose weighted-average credit quality is determined to be less than "BBB-"; medium are those less than "AA-", but greater or equal to "BBB-"; and high are those with a weighted-average credit quality of "AA-" or higher. When classifying a bond portfolio, Morningstar first maps the NRSRO credit ratings of the underlying holdings to their respective default rates (as determined by Morningstar's analysis of actual historical default rates). Morningstar then averages these default rates to determine the average default rate for the entire bond fund. Finally, Morningstar maps this average default rate to its corresponding credit rating along a convex curve.

For interest-rate sensitivity, Morningstar obtains from fund companies the average effective duration. Generally, Morningstar classifies a fixed-income fund's interest-rate sensitivity based on the effective duration of the Morningstar Core Bond Index (MCBI). The classification of Limited will be assigned to those funds whose average effective duration is between 25% to 75% of MCBI's average effective duration; funds whose average

---

**STATEMENT OF ADDITIONAL DISCLOSURES**

---

effective duration is between 75% to 125% of the MCBI will be classified as Moderate; and those that are at 125% or greater of the average effective duration of the MCBI will be classified as Extensive.

For municipal bond funds, Morningstar also obtains from fund companies the average effective duration. In these cases, static breakpoints are utilized. These breakpoints are as follows: (i) Limited: 4.5 years or less; (ii) Moderate: more than 4.5 years but less than 7 years; and (iii) Extensive: more than 7 years. In addition, for non-US taxable and non-US domiciled fixed income funds static duration breakpoints are used: (i) Limited: less than or equal to 3.5 years; (ii) Moderate: greater than 3.5 and less than equal to 6 years; (iii) Extensive: greater than 6 years.

The referenced data elements below are a weighted average of the long fixed income holdings in the portfolio.

Average Effective Duration is a weighted average of the duration of the underlying fixed income securities within the portfolio.

Average Effective Maturity is a weighted average of all the maturities of the bonds in a portfolio, computed by weighting each maturity date by the market value of the security.

Average Weighted Price is generated from the fund's portfolio by weighting the price of each bond by its relative size in the portfolio. This number reveals if the fund favors bonds selling at prices above or below face value (premium or discount securities, respectively). A higher number indicates a bias toward premiums. This statistic is expressed as a percentage of par (face) value.

Credit Quality Breakdowns are shown for corporate-bond holdings and depict the quality of bonds in the underlying portfolio. The report shows the percentage of fixed-income securities that fall within each credit quality rating as assigned by an NRSRO. Bonds not rated by an NRSRO are included in the not rated (NR) category.

Turnover Ratio is a decent proxy for how frequently a manager trades his or her portfolio. The inverse of a fund's turnover ratio is the average holding period for a security in the fund. As turnover increases, a fund's brokerage costs typically rise as well.

**WEIGHTINGS & HOLDINGS**

**Sector Weightings.** Calculated for all stock and bond funds based on the securities in the fund's most recent portfolio. For stock funds, this statistic shows the percentage of the fund's stock assets invested in each of the 12 major equity sectors. For taxable bond funds, this statistic shows the percent of the fund's cash and bond assets invested in each of the 14 fixed-income sectors. For municipal bond funds, this statistic shows the percentage of the fund's municipal assets invested in each of the 11 muni sectors.

**Regional Weightings.** This data set provides a broad breakdown of a fund's geographical exposure for a region. Each region's exposure is presented as a percentage of non-cash equity assets held by the fund. Regional exposure information summarizes a portfolio's exposure to geopolitical risk.

**IPS Alignment.** If a current holding does not fit within the ranges specified in the Investment Policy Statement, an alignment notice is generated. A notice can occur due to temporary style drift in an investment, a difference in categorization methodology or a gap in allocation.

**CLIENT PERFORMANCE**

**Client performance.** Performance is calculated using the current investments and allocations (as they exist today). The portfolio will grow each year and then rebalance back to that original allocation on an annual basis. Performance represents historical performance of the current investments in the portfolio.

The monthly investment returns used in the calculations are Total Returns (with no loads included) so they are not adjusted for sales charges (such as front-end loads, deferred loads and redemption fees), but do reflect management, administrative, 12b-1 fees and other costs taken out of fund assets.

If an investment does not have a return for a given month, the weighted return for only that month is calculated excluding the investment's allocation. These are identified within the tables.

The individual investment monthly returns are compounded to result in the corresponding portfolio return and risk metrics shown in this report.

Blended Benchmark performance is calculated as follows:

If a custom benchmark is assigned, the returns are reflective of the specified indices included in the benchmark.

## STATEMENT OF ADDITIONAL DISCLOSURES

A weighted return is calculated for each month based on the index allocations utilized for that month.

The same rebalancing schedule used in the portfolio is applied to the custom benchmark.

If an index does not have a return for a particular month, it will be excluded from the calculations.

The individual monthly returns are then compounded to result in the corresponding annualized returns shown in the report.

Peer Group Benchmark performance is calculated as follows:

Returns are reflective of the median manager's performance for each peer group utilized in the portfolio.

A weighted return is calculated for each month based upon the investments and allocations utilized for that month.

The same rebalancing schedule used in the portfolio is applied to the peer group benchmark.

If a peer group does not have a median return for a particular month, the assigned index return will be used instead.

The individual monthly returns are then compounded to result in the corresponding annualized returns shown in the report.

The performance of the peer group benchmark and blended benchmark (if included) are not an exact representation of any particular investment, as you cannot invest directly in an index or the peer group median manager that are used in the calculations.

**Client Growth of 10k Chart.** The Growth of 10k chart shows a client's performance based on how \$10,000 invested in the portfolio would have grown over time with dividends reinvested. The returns used in the graph are not load-adjusted. Located alongside the portfolio graph line are lines that represent the growth of \$10,000 in the Peer Group Benchmark, and if selected, the Blended Benchmark. The Peer Group Benchmark and the Blended Benchmark are detailed below the performance tables. All lines are plotted on a logarithmic scale, so that identical percentage changes in values have the same vertical distance on the graph. This provides a more accurate representation of performance than would a simple arithmetic graph.

**Client Benchmarks.** A benchmark gives an investor a point of reference for evaluating a portfolio's performance by comparing benchmark returns to the portfolio's returns. This report may use the following types of benchmarks:

**Blended Benchmark.** This custom benchmark is specified by the financial advisor or other third party who constructed the portfolio. It usually contains a blended set of indices which best represent the underlying risks and objectives of a given portfolio. Fi360 calculates a weighted monthly return based on these underlying indices.

**Peer Group Benchmark.** Fi360 will automatically take each investment in the portfolio and map it to their corresponding peer group for each historical period used in the calculations. We then use the median manager return for that peer group and calculate a weighted monthly return based on these median manager returns. This provides a benchmark as if you were invested in the median manager of a given peer group instead of the actual investment manager that was selected. So, any outperformance of the portfolio to this benchmark usually denotes that you have selected investments which have consistently outperformed the median of their peer groups.

Indices are unmanaged and cannot be invested in directly. Please reference the Index Descriptions section for more specific detail on each index that is included in this report.

## TOTAL PLAN COSTS COMPARED TO BENCHMARK

**Investment Option & Advisory Fees.** Fi360 aggregates plan data across 125+ recordkeepers on a monthly basis for a variety of Broker Dealers, RIAs and Bank Trust clients. Within these plan data feeds, the underlying plan holdings are captured and many also include the ongoing advisor compensation being paid by the plan. This aggregated, anonymized data is used to calculate the benchmark statistics.

For the plan holdings, our goal is to arrive at the net management fees kept by the manager and not include any revenue sharing as that is already taken into account within the calculation of the recordkeeper and/or advisory costs. The process starts by matching each holding against our Morningstar® data feeds to capture each investment's net expense ratio. Then, for any retirement share class (as defined by Morningstar), we subtract an estimated revenue sharing amount by utilizing the lowest cost share class as a proxy instead (Ex. If the plan had an R2, we use the R6 expense ratio instead). While not exact, this provides a proxy for the true investment costs retained by the fund manager. Any investments which

## STATEMENT OF ADDITIONAL DISCLOSURES

cannot be matched to an expense ratio are excluded. We then calculate an average expense ratio for the plan using this information, regardless of balance invested.

For the advisor compensation, we isolate the ongoing asset based compensation being paid to the advisor and calculate the benchmarks using this statistic.

In both cases, the 25th, 50th and 75 percentile ranges are calculated for the following plan size ranges (all in millions). Up to 0.5; 0.5-1; 1-3; 3-5; 5-10; 10-25; 25-50; 50-100; 100-250; 250-500; 500+. The number of plans in each category's applicable range is shown in the table within the Annual Cost Summary report section.

**Recordkeeping/Admin Fees.** The benchmark statistics for this category are derived from Fi360's "RFP Director" software application which contains a database of RFPs and the corresponding recordkeeper proposals that were submitted in response. Any RFP with valid recordkeeper responses over the last 2 years is included within the benchmark set. A plan's peer group is based on Plan Size and the average participant account balance as many of these costs are driven not just by plan size, but by the number of participants as well. The 25th, 50th and 75 percentile ranges are calculated for the following plan size ranges (all in millions). Up to 0.5; 0.5-1; 1-3; 3-5; 5-10; 10-25; 25-50; 50-100; 100-250; 250-500; 500+. Within each plan size range, the peer group is further divided for average account balances of <10k; 10-50k; 50-100k; 100-250k; 250k+.

The number of recordkeeper proposals in the plan's applicable range is shown in the table within the Annual Cost Summary report section.

**STATEMENT OF ADDITIONAL DISCLOSURES: EXTENDED PERFORMANCE**

The analysis in this report may be based, in part, on adjusted historical returns for periods prior to an investment share class's actual inception.

Morningstar created extended performance statistics to "fill in the gap" between the inception date of a new share class or distribution channel and the inception date of the original portfolio. Extended performance lengthens the performance data that is available for the younger investment. This helps investors see how the portfolio as a whole has performed over time. For example, if a mutual fund started 15 years ago with an Investor share class and just added an Institutional share class one year ago, Morningstar will lengthen the performance history of the Institutional share class to 15 years. Often, some of the shareholders in the new share class were actually shareholders in the oldest share class.

Morningstar will adjust the performance history of the original portfolio to reflect differences in fees between the original share class and the younger share class. This adjustment will only occur where the new share class has higher fees than the oldest share class, so the extended performance for the younger share class will be lower than, or equal to, the returns of the oldest share class. Where the oldest share class has higher fees than the younger share class no adjustment is made. In this case, if the expenses of the newer share class were used rather than the expenses of the old share class (due to lower expenses of the new share class), it would have resulted in better performance.

## STATEMENT OF ADDITIONAL DISCLOSURES: INDEX DESCRIPTIONS

### Barclays.

This following indices are part of this family:

- BBgBarc US Agg Bond TR USD.** The index measures the performance of investment grade, U.S. dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM passthroughs), ABS, and CMBS. It rolls up into other Barclays flagship indices, such as the multi-currency Global Aggregate Index and the U.S. Universal Index, which includes high yield and emerging markets debt.
- BBgBarc US Universal TR USD.** The index measures the performance of USD-denominated, taxable bonds that are rated either investment grade or high-yield. It represents the union of the U.S. Aggregate Index, U.S. Corporate High Yield Index, Investment Grade 144A Index, Eurodollar Index, U.S. Emerging Markets Index, and the non-ERISA eligible portion of the CMBS Index.

**LSE Group.** London Stock Exchange Group plc and its group undertakings (collectively, the "LSE Group"). © LSE Group 2022. FTSE Russell is a trading name of certain of the LSE Group companies. "FTSE®", "Russell®", "FTSE Russell®", "MTS®", "FTSE4Good®", "ICB®", "Mergent®", is/are a trademark(s) of the relevant LSE Group companies and is/are used by any other LSE Group company under license. All rights in the FTSE Russell indexes or data vest in the relevant LSE Group company which owns the index or the data. Neither LSE Group nor its licensors accept any liability for any errors or omissions in the indexes or data and no party may rely on any indexes or data contained in this communication. No further distribution of data from the LSE Group is permitted without the relevant LSE Group company's express written consent. The LSE Group does not promote, sponsor or endorse the content of this communication.

This following indices are part of this family:

- Russell 1000 Growth TR USD.** The index measures the performance of the large-cap growth segment of the US equity securities. It includes the Russell 1000 index companies with higher price-to-book ratios and higher forecasted growth values. It is market-capitalization weighted. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group.
- Russell 1000 TR USD.** The index measures the performance of the large-cap segment of the US equity securities. It is a subset of the Russell 3000 index and includes approximately 1000 of the largest securities based on a combination of their market cap and current index membership.
- Russell 2000 Growth TR USD.** The index measures the performance of small-cap growth segment of the US equity universe. It includes those Russell 2000 companies with higher price-to-value ratios and higher forecasted growth values. It is market-capitalization weighted. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group.
- Russell 2000 TR USD.** The index measures the performance of the small-cap segment of the US equity universe. It is a subset of the Russell 3000 and includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group.
- Russell Mid Cap Growth TR USD.** The index measures the performance of the mid-cap growth segment of the US equity universe. It includes Russell midcap index companies with higher price-to-book ratios and higher forecasted growth values. It is market-capitalization weighted. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group.
- Russell Mid Cap Value TR USD.** The index measures the performance of the mid-cap value segment of the US equity universe. It includes Russell midcap index companies with lower price-to-book ratios and lower forecasted growth values. It is market-capitalization weighted.

### Morningstar.

This following indices are part of this family:

- Morningstar Lifetime Mod 2020 TR USD.** The index measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for a US investor who is about ten years away

## STATEMENT OF ADDITIONAL DISCLOSURES: INDEX DESCRIPTIONS

from retirement. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility.

- Morningstar Lifetime Mod 2025 TR USD.** The index measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for a US investor who is about 15 years away from retirement. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility.
- Morningstar Lifetime Mod 2030 TR USD.** The index measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for a US investor who is about 20 years away from retirement. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility.
- Morningstar Lifetime Mod 2035 TR USD.** The index measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for a US investor who is about 25 years away from retirement. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility.
- Morningstar Lifetime Mod 2040 TR USD.** The index measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for a US investor who is about 30 years away from retirement. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility.
- Morningstar Lifetime Mod 2045 TR USD.** The index measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for a US investor who is about 35 years away from retirement. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility.
- Morningstar Lifetime Mod 2050 TR USD.** The index measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for a US investor who is about 40 years away from retirement. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility.
- Morningstar Lifetime Mod 2055 TR USD.** The index measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for a US investor who is about 45 years away from retirement. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility.
- Morningstar Lifetime Mod 2060 TR USD.** The index measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for a US investor who is about 45 years away from retirement. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility.

This following indices are part of this family:

- MSCI ACWI NR USD.** The index measures the performance of the large and mid cap segments of all country markets. It is free float-adjusted market-capitalization weighted.

#### US Treasury.

This following indices are part of this family:

- USTREAS T-Bill Cnst Mat Rate 3 Yr.** Treasury Yield Curve Rates, commonly referred to as "Constant Maturity Treasury" rates, or CMTs, are interpolated by the U.S. Treasury from the daily yield curve. This curve, which relates the yield on a security to its time to maturity is based on the closing market bid yields on actively traded Treasury securities in the over-the-counter market. These market yields are calculated from composites of quotations obtained by the Federal Reserve Bank of New York. The yield values are read from the yield curve at a fixed maturity of 3 years.

## STATEMENT OF ADDITIONAL DISCLOSURES: PEER GROUP DESCRIPTIONS

- **Intermediate Core Bond (CI).** Intermediate-term core bond portfolios invest primarily in investment-grade U.S. fixed-income issues including government, corporate, and securitized debt, and hold less than 5% in below-investment-grade exposures. Their durations (a measure of interest-rate sensitivity) typically range between 75% and 125% of the three-year average of the effective duration of the Morningstar Core Bond Index.
- **Intermediate Core-Plus Bond (PI).** Intermediate-term core-plus bond portfolios invest primarily in investment-grade U.S. fixed-income issues including government, corporate, and securitized debt, but generally have greater flexibility than core offerings to hold non-core sectors such as corporate high yield, bank loan, emerging-markets debt, and non-U.S. currency exposures. Their durations (a measure of interest-rate sensitivity) typically range between 75% and 125% of the three-year average of the effective duration of the Morningstar Core Bond Index.
- **Large Blend (LB).** Large-blend portfolios are fairly representative of the overall US stock market in size, growth rates and price. Stocks in the top 70% of the capitalization of the US equity market are defined as large cap. The blend style is assigned to portfolios where neither growth nor value characteristics predominate. These portfolios tend to invest across the spectrum of US industries, and owing to their broad exposure, the portfolios' returns are often similar to those of the S&P 500 Index.
- **Large Growth (LG).** Large-growth portfolios invest primarily in big U.S. companies that are projected to grow faster than other large-cap stocks. Stocks in the top 70% of the capitalization of the U.S. equity market are defined as large cap. Growth is defined based on fast growth (high growth rates for earnings, sales, book value, and cash flow) and high valuations (high price ratios and low dividend yields). Most of these portfolios focus on companies in rapidly expanding industries.
- **Mid-Cap Growth (MG).** Some mid-cap growth portfolios invest in stocks of all sizes, thus leading to a mid-cap profile, but others focus on midsize companies. Mid-cap growth portfolios target U.S. firms that are projected to grow faster than other mid-cap stocks, therefore commanding relatively higher prices. Stocks in the middle 20% of the capitalization of the U.S. equity market are defined as mid-cap. Growth is defined based on fast growth (high growth rates for earnings, sales, book value, and cash flow) and high valuations (high price ratios and low dividend yields).
- **Mid-Cap Value (MV).** Some mid-cap value portfolios focus on medium-size companies while others land here because they own a mix of small-, mid-, and large-cap stocks. All look for U.S. stocks that are less expensive or growing more slowly than the market. Stocks in the middle 20% of the capitalization of the U.S. equity market are defined as mid-cap. Value is defined based on low valuations (low price ratios and high dividend yields) and slow growth (low growth rates for earnings, sales, book value, and cash flow).
- **Small Blend (SB).** Small-blend portfolios favor U.S. firms at the smaller end of the market-capitalization range. Some aim to own an array of value and growth stocks while others employ a discipline that leads to holdings with valuations and growth rates close to the small-cap averages. Stocks in the bottom 10% of the capitalization of the U.S. equity market are defined as small cap. The blend style is assigned to portfolios where neither growth nor value characteristics predominate.
- **Small Growth (SG).** Small-growth portfolios focus on faster-growing companies whose shares are at the lower end of the market-capitalization range. These portfolios tend to favor companies in up-and-coming industries or young firms in their early growth stages. Because these businesses are fastgrowing and often richly valued, their stocks tend to be volatile. Stocks in the bottom 10% of the capitalization of the U.S. equity market are defined as small cap. Growth is defined based on fast growth (high growth rates for earnings, sales, book value, and cash flow) and high valuations (high price ratios and low dividend yields).
- **Stable Value (VL).** Stable-value portfolios seek to provide income while preventing price fluctuations. The most common stable-value portfolios invest in a diversified portfolio of bonds and enter into wrapper agreements with financial companies to guarantee against fluctuations in their share prices. These wrapper agreements typically provide price stability on a day-to-day basis, thereby insulating each portfolio's net asset value from interest-rate volatility. Therefore, the duration for each of these funds is essentially zero. This category is only used in Morningstar's custom fund, separate account, and collective investment trust databases.
- **Target-Date 2020 (TE).** Target-date portfolios provide diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2016-2020) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to moreconservative mixes as the target date approaches, following a preset glide path. A target-date portfolio is part of a series of funds offering multiple retirement dates to investors.
- **Target-Date 2025 (TC).** Target-date portfolios provide diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2021-2025) for retirement. These portfolios aim to provide investors with an optimal level of return and

## STATEMENT OF ADDITIONAL DISCLOSURES: PEER GROUP DESCRIPTIONS

risk, based solely on the target date. Management adjusts the allocation among asset classes to moreconservative mixes as the target date approaches, following a preset glide path. A target-date portfolio is part of a series of funds offering multiple retirement dates to investors.

- **Target-Date 2030 (TH).** Target-date portfolios provide diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2026-2030) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to moreconservative mixes as the target date approaches, following a preset glide path. A target-date portfolio is part of a series of funds offering multiple retirement dates to investors.
- **Target-Date 2035 (TI).** Target-date portfolios provide diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2031-2035) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to moreconservative mixes as the target date approaches, following a preset glide path. A target-date portfolio is part of a series of funds offering multiple retirement dates to investors.
- **Target-Date 2040 (TJ).** Target-date portfolios provide diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2036-2040) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to moreconservative mixes as the target date approaches, following a preset glide path. A target-date portfolio is part of a series of funds offering multiple retirement dates to investors.
- **Target-Date 2045 (TK).** Target-date portfolios provide diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2041-2045) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to moreconservative mixes as the target date approaches, following a preset glide path. A target-date portfolio is part of a series of funds offering multiple retirement dates to investors.
- **Target-Date 2050 (TN).** Target-date portfolios provide diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2046-2050) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to moreconservative mixes as the target date approaches, following a preset glide path. A target-date portfolio is part of a series of funds offering multiple retirement dates to investors.
- **Target-Date 2055 (TL).** Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2051-2055 and beyond) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to more-conservative mixes as the target date approaches, following a preset glide path. A targetdate portfolio is part of a series of funds offering multiple retirement dates to investors.
- **Target-Date 2060 (XQ).** Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2056-2060) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to more-conservative mixes as the target date approaches, following a preset glide path. A target-date portfolio is part of a series of funds offering multiple retirement dates to investors.
- **World Large-Stock Blend (WB).** World large-stock blend portfolios invest in a variety of international stocks and typically skew towards large caps that are fairly representative of the global stock market in size, growth rates, and price. World large stock blend portfolios have few geographical limitations. It is common for these portfolios to invest the majority of their assets in developed markets, with the remainder divided among the globe's emerging markets. These portfolios are not significantly overweight U.S. equity exposure relative to the Morningstar Global Market Index and maintain at least a 20% absolute U.S. exposure.
- **World Large-Stock Growth (WG).** World large-stock growth portfolios invest in a variety of international stocks and typically skew towards large caps that are more expensive or projected to grow faster than other global large-cap stocks. World large stock growth portfolios have few geographical limitations. It is common for these portfolios to invest the majority of their assets in developed markets, with the remainder divided among the globe's emerging markets. These portfolios are not significantly overweight U.S. equity exposure relative to the Morningstar Global Market Index and maintain at least a 20% absolute U.S. exposure.

**STATEMENT OF ADDITIONAL DISCLOSURES: RISKS**

Investing involves risk. Loss of principal is possible. An investment in a fund is not a bank deposit, and it is not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other government agency. Each fund carries its own specific risks which depend on the types of investments in the fund. Investors should review the fund's prospectus carefully to understand the risks before investing.

In general, some of the risks associated with the Morningstar Categories shown in this report are as follows:

- **Allocation.** Different methods of asset allocation are associated with varying degrees of risks. Conservative portfolios contain low risk investments but may not earn any value over time. Moderate portfolios have a higher level of risk than conservative portfolios. Aggressive portfolios mainly consist of equities, so their value tends to fluctuate widely.
- **Bonds.** Bonds are subject to interest rate risk. As the prevailing level of bond interest rates rise, the value of bonds already held in a portfolio decline. Portfolios that hold bonds are subject to declines and increases in value due to general changes in interest rates. Bonds are also subject to prepayment risk, which is the chance that an issuer may exercise its right to prepay its security, if falling interest rates prompt the issuer to do so. Forced to reinvest the unanticipated proceeds at lower interest rates, the fund would experience a decline in income and lose the opportunity for additional price appreciation.
- **Foreign.** Investments in foreign securities may be more volatile than investing solely in U.S. markets due to interest-rate, currency, exchange rate, economic, and political risks. The value of these securities can change more rapidly and extremely than can the value of U.S. securities. Foreign securities are subject to increased issuer risk because foreign issuers may not experience the same degree of regulation as U.S. issuers do and are held to different reporting, accounting, and auditing standards. In addition, foreign securities are subject to increased costs because there are generally higher commission rates on transactions, transfer taxes, higher custodial costs, and the potential for foreign tax charges on dividend and interest payments. Many foreign markets are relatively small, and securities issued in less-developed countries face the risks of nationalization, expropriation or confiscatory taxation, and adverse changes in investment or exchange control regulations, including suspension of the ability to transfer currency from a country. Economic, political, social, or diplomatic developments can also negatively impact performance.
- **Foreign Currencies.** Foreign currencies are subject to the risks associated with such currencies and the changes in their values relative to the U.S. dollar. Such risks include volatility in the price relationship between the U.S. dollar and foreign currencies. The value of foreign currencies relative to the U.S. dollar can be affected by many factors, including national debt levels, trade deficits, international trade and foreign policies, changes in trade and balance of payments, governmental fiscal and monetary policies, currency exchange rates and changes in supply and demand that affect those rates, investment and trading activity of mutual funds, hedge funds and currency funds, exchange rate controls and government intervention in currency markets, inflation rates, interest and deposit rates, market expectations about future inflation rates and interest rates, and global and national economic, financial, political, regulatory, judicial, military and geographical events or developments. Prices of currencies of less developed or emerging market nations tend to be more volatile than those of developed countries, given the greater political, regulatory, economic, financial, military and social instability and uncertainty in less developed or emerging market nations.
- **Foreign Regions.** Investments in securities from a particular country or region may be subject to the risk of adverse social, political, regulatory, or economic events occurring in that country or region. Country- or region-specific risks also include the risk that adverse securities markets or exchange rates may impact the value of securities from those areas.
- **Large Cap Equities.** Concentrating assets in large-capitalization stocks may subject the portfolio to the risk that those stocks underperform other capitalizations or the market as a whole. Large-cap companies may be unable to respond as quickly as small- and mid-cap companies can to new competitive pressures and may lack the growth potential of those securities. Historically, large-cap companies do not recover as quickly as smaller companies do from market declines.
- **Small/Mid Cap Equities.** Portfolios that invest in stocks of small- to mid-cap companies involve additional risks. Smaller companies typically have a higher risk of failure and are not as well established as larger blue-chip companies. Historically, smaller company stocks have experienced a greater degree of market volatility than the overall market average.
- **Target-Date Funds.** Target-date funds typically invest in other mutual funds and are designed for investors who are planning to retire during the target date year. The fund's target date is the approximate date of when investors expect to begin withdrawing their money. A target-date fund's investment objective/strategy typically becomes more conservative over time primarily by reducing its allocation to equity mutual funds and increasing its allocations in fixed-income mutual funds. An investor's principal value in a target-date fund is not guaranteed at any time, including at the fund's target date.

---

## STATEMENT OF ADDITIONAL DISCLOSURES: RISKS

---

- **Taxable Bond.** Investments in taxable bonds such as government bonds, long-term and short-term bonds, bank loans, corporate bonds, preferred stock, high-yield bonds, etc. are subject to numerous risks including those relating to reinvestment, inflation, market, selection, timing, and duration.
